## Introduction

Congratulations on your selection of a Casio SF-7000/7500. This amazing compact personal data management tool makes it possible for you to carry volumes of information in your pocket or purse wherever you go.

A **Telephone Directory** holds names, addresses, telephone numbers and other data for instant recall.

A **Business Card Library** stores such professional data as personal name, organization name, position, telex number, and much more.

An electronic **Schedule Keeper** keeps track of your appointments and special occasions, and features schedule alarms that can be set independently of the appointment time.

A **Memo Mode** is useful for storage of lists, timetables, or other such data.

A **Calendar Display** produces full month calendars from January 1, 1901 through December 31, 2099.

A **World Time** function that tells you the time in any one of 127 cities around the globe.

A **Secret Memory Area** restricts access to only those who can enter a secret password.

**Data Communications** capabilities. The unit can be connected each other and also can be connected to an IBM PC/AT or PS/2 personal computer or a printer.

This and much more makes the Casio SF-7000/7500 the most advanced personal data management tool available. Be sure to read this manual to get the most out of these features and functions, and to ensure that your information is stored securely.

## Before Beginning Operation

### Precautions

Note the following important precautions to ensure that you get the most out of your SF-7000/7500.

- Never try to take your SF-7000/7500 apart.
- Avoid strong impact and sudden temperature changes.
- At very low temperatures, the display response time may slow down or the display may fail completely. This is temporary, and correct operation should return at normal temperature.
- When the message "MAIN POWER SUPPLY BATTERIES GETTING WEAK ! REPLACE !" appears on the display, switch power off and replace batteries.
- To avoid serious damage caused by leaking batteries, replace batteries once every two years, regardless of how much you use the SF-7000/7500.
- Never use thinner, benzine or other volatile agents to clean the exterior of the SF-7000/7500. Instead, wipe it off with a soft cloth dampened in a solution of water and a mild, neutral detergent. Wring the cloth out until it is almost dry.
- If the SF-7000/7500 is exposed to strong static electrical charges, the display may dim or the SF-7000/7500 may lock up. To correct this situation, switch power off, and then remove and then replace the main power supply batteries.
- Do not press the keys of the SF-7000/7500 with a pen, pencil or other sharp object.
- The SF-7000/7500 may cause interference with radio or television reception. Keep it away from such appliances when in use.
- Casio Computer Co., Ltd. assumes no responsibility for any damage or loss resulting from the use of this manual.
- Casio Computer Co., Ltd. assumes no responsibility for any loss or claims by third parties which may arise through the use of the SF-7000/7500.
- Casio Computer Co., Ltd. assumes no responsibility for any damage or loss caused by deletion of data as a result of malfunction, repairs, or battery replacement. Be sure to back up all important data on other media to protect against its loss.

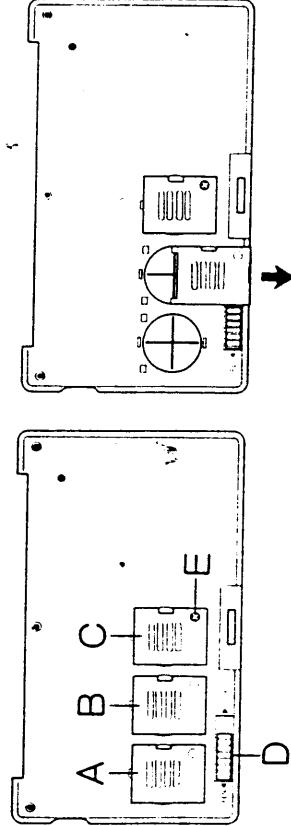

### About power supplies

Your SF-7000/7500 is powered by two CR2025 lithium main power supply batteries. In addition, another CR2025 battery provides backup power to protect memory contents when the SF-7000/7500 is switch off or when the main power supply batteries are being replaced.

#### Important

- Be sure to read the following precautions before replacing batteries.
  - Batteries A, and B in the illustration below are for the *main power supply*, while battery C is for *memory backup*.
  - If you remove the main power supply batteries and the memory back-up battery at the same time, *data stored in the memory of the SF-7000/7500 will be erased*.
- When the message "MAIN POWER SUPPLY BATTERIES GETTING WEAK ! REPLACE !" appears on the display, replace the main power supply batteries as soon as possible.
  - To avoid damage caused by leakage of battery fluid, replace batteries once every two years regardless of how much the unit has been used during that time.

## To replace the main power supply batteries

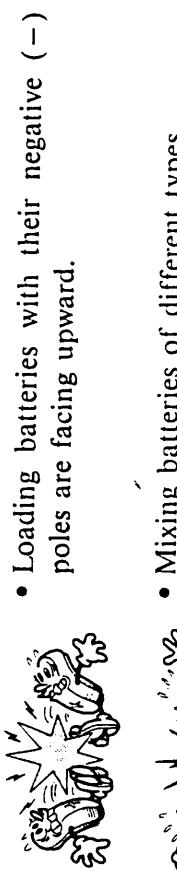

1. Switch the power of the SF-7000/7500 OFF.
2. Remove the three screws that hold the back panel of the SF-7000/7500 in place, and remove the panel.
3. Slide the battery lock switch (D) in the direction of the arrow marked OPEN.
4. Slide the battery covers of the main power supply batteries down to remove them.
5. Remove the old main power supply batteries and replace them with a pair of new batteries, ensuring that the positive (+) poles are on top.
6. Replace the battery covers by pressing down on the batteries and sliding the covers up until they lock in place.
7. Slide the battery lock switch (D) in the direction of the arrow marked LOCK.
8. Replace the back panel of the SF-7000/7500 and fasten it in place with the three screws.

## To replace the backup battery

1. Switch the power of the SF-7000/7500 OFF.
2. Remove the three screws that hold the back panel of the SF-7000/7500 in place, and remove the panel.
3. Remove the screw (E) that fastens the backup battery cover in place.
4. Replace the backup battery cover following the same procedure as described above for replacement of the main power supply batteries.
5. After replacing the battery cover, be sure to replace the screw (E) that fastens the backup battery cover in place.
6. Replace the back panel of the SF-7000/7500 and fasten it in place with the three screws.

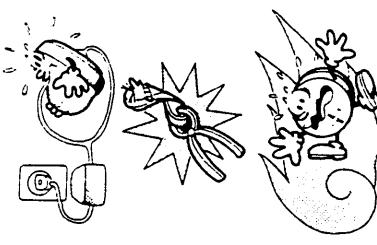

## Important

The following situations can cause batteries to leak, possibly damaging the interior of your SF-7000/7500.

• Mixing batteries of different types.

- Mixing old and new batteries.
- Charging batteries or exposing them to high temperatures.

*Keep batteries out the reach of small children. If swallowed, consult with a physician immediately.*

A

## About the Auto Power OFF function

The SF-7000/7500's Auto Power OFF function conserves battery power by automatically switching power OFF if the unit is not used for approximately six minutes. To restore power, press the [OK] key.

- Memory contents are protected while power is switched OFF.
- If a schedule alarm or a daily alarm is preset, power automatically switches ON when the alarm time is reached.

## Storage Capacity

The 64K byte memory capacity (32K bytes for SF-7000) includes a 62,092-byte user area (29,324 bytes for SF-7000). The following shows examples of what this means for the storage of data in each mode.

### Telephone Directory

Approximately 2,950 (1,400 for SF-7000), under the following conditions:

- 8-character name
  - 10-character telephone number
- Approximately 1,470 (700 for SF-7000), under the following conditions:
- 8-character name
  - 10-character telephone number
  - 20-character address

### Business Card Library

Approximately 680 (320 for SF-7000), under the following conditions:

- 10-character employer name
- 8-character personal name
- 10-character telephone number
- 10-character position
- 10-character department
- 20-character address

Approximately 760 (360 for SF-7000), when five business card items are stored for each employer under the conditions described above.

## Memo

Approximately 2,820 (1,300 for SF-7000)'20-character memos.

## Schedule Keeper

Approximately 2,060 (950 for SF-7000), under the following conditions:

- 1 item per day, 20 characters per item
- 30 days per month

Starting time specified, alarm time set

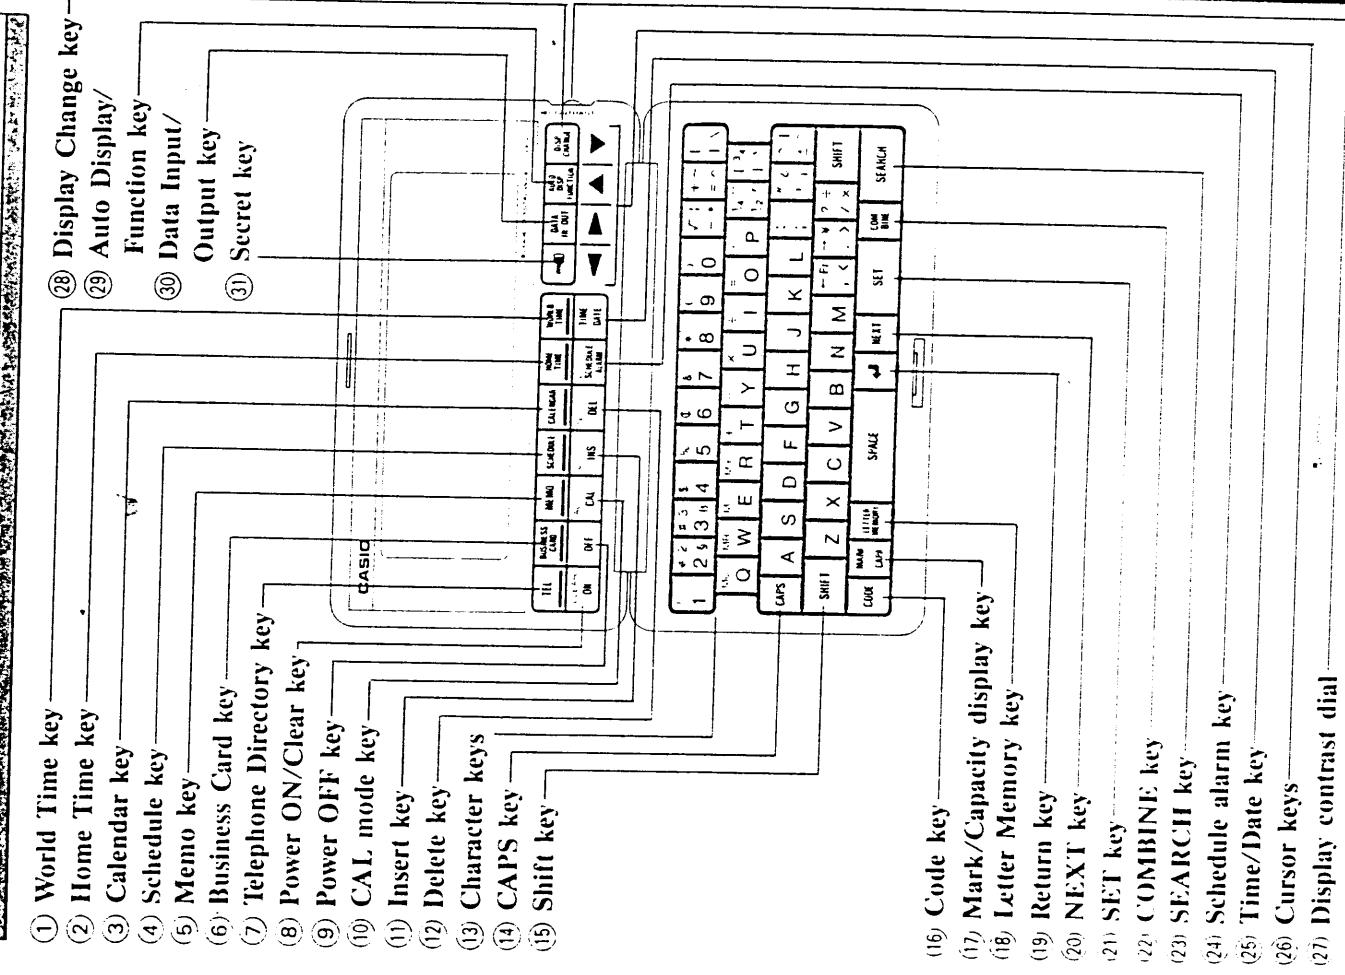

Approximately 2,370 (1,100 for SF-7000), under the following conditions:

- 1 item per day, 20 characters per item
- 30 days per month

Starting time specified, no alarm time

## Keys

## Key Functions

No.	Name	Function	Key CAP
(1)	World Time key	Press this key to enter the World Time Display.	WORLD
(2)	Home Time key	Press this key to enter the Home Time Display to switch between 12-hour and 24-hour formats, or to change the daily alarm time.	HOME
(3)	Calendar key	Press this key to enter the Calendar Display.	CAL
(4)	Schedule key	Press this key to enter the Schedule Keeper for data input or recall.	SCHEDULE
(5)	Memo key	Press this key to enter the Memo Mode for data input or recall.	MEMO
(6)	Business Card key	Press this key to enter the Business Card Library for data input or recall.	BUSINESS CARD
(7)	Telephone Directory key	Press this key to enter the Telephone Directory for data input or recall.	TEL
(8)	Power ON/Clear key	Power ON/Clear key • Use this key to switch power ON or to restore power after it has been switched OFF by the Auto Power OFF function. • In the Telephone Directory, Business Card Library, Memo Mode, Calendar Display and Schedule Keeper, pressing this key clears the display.	ON
(9)	Power OFF key	Press this key to switch power OFF. Memory contents are retained even when power is switched OFF.	OFF
(10)	CAL mode key	Enters the CAL mode for arithmetic calculations.	CAL
(11)	Insert key	During data input, press this key to open a space at the current cursor position for insertion of a character between two other characters. Holding this key down inserts spaces continuously at high speed.	[INS]

2. Press **[⑥]**.

## Entering text

**[⑥]**

\*\*\* SOUND \*\*\*

SCHEDULE ALARM	ON	• OFF
DAILY ALARM	ON	• OFF
KEY	ON	• OFF

3. This display indicates that the SCHEDULE ALARM, DAILY ALARM and KEY input tone are all OFF. Press the **[▼]** key twice until KEY ON/OFF is underlined. Now, each time you press the **[◀]** or **[▶]** key, the KEY input tone switches ON and OFF.

**[▼] [▶]**

\*\*\* SOUND \*\*\*

\*\*\* SOUND \*\*\*

SCHEDULE ALARM	ON	• OFF
DAILY ALARM	ON	• OFF
KEY	ON	• OFF

Press the **[SET]** key to register the current settings.

- The following are the default specifications following the RESET operation.

SCHEDULE ALARM	• ON	OFF
DAILY ALARM	ON	• OFF
KEY	ON	OFF

### About the cursor

The cursor is a short line that flashes on the display to indicate where the next character will appear when you press a key. Each time you press a key the cursor moves to the next position to the right. You can also move the cursor on the display using the cursor keys.

### Moving the cursor on the display

Use the **[◀]**, **[▷]**, **[▲]**, **[▼]** cursor keys to move the cursor in the corresponding direction on the display. Holding any of these keys down moves the cursor at high speed.

#### To move the cursor left and right

Press the **[◀]** key to move the cursor to the left, and the **[▷]** key to move it to the right.

If you press the **[◀]** key while the cursor is at the left edge of the display, the cursor will move up to the last (farthest to the right) position of the next line up.

If you press the **[▷]** key while the cursor is at the last (farthest to the right) position of a line, the cursor will move down to the first (farthest to the left) position of the next line down.

XXXXXXXXXXXXXX	X	XXXXXX
X	.....	X
.....	.....	.....

#### To move the cursor to the beginning of a line

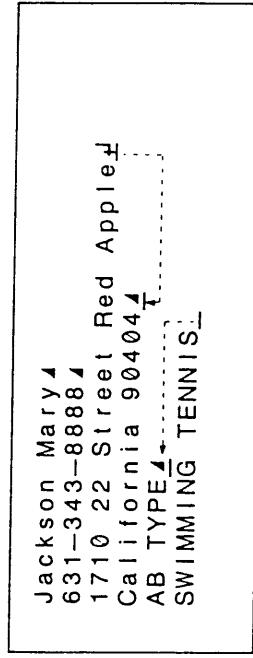

Press **[SET]** followed by **[◀]** to make the cursor move directly to the beginning of the current line.

### To move the cursor to the end of a line

Press **[Shift]** followed by **[▼]** to make the cursor move directly to the end of the current line.

### To move the cursor up and down

Press the **[▲]** key to move the cursor up, and the **[▼]** key to move it down. If you press the **[▲]** or **[▼]** key while the cursor is at the last (farthest to the right) position of a line, the cursor will move up or down to the last (farthest to the right) position of the next line.

### About the **[Caps]** key

You can switch the keyboard between lower-case and upper-case characters by pressing the **[Caps]** key. The **[Caps]** indicator is shown on the display during upper-case character input.

### About the **[Shift]** key

The **[Shift]** key temporarily shifts the function of the keyboard. If the keyboard is set for upper-case character input, press **[Shift]** followed by a character key to enter a single lower-case character. During lower-case input, pressing **[Shift]** followed by a character key enters the character in upper-case. As soon as you enter the character, the **[Shift]** operation is cancelled automatically. Symbols marked in green (red ... SF-7000) on the keyboard can also be entered after you press the **[Shift]** key.

When you press the **[Shift]** key, the indicator **[S]** appears on the display to indicate that the keyboard is shifted. This indicator disappears as soon as you press the next key.

### About the **[Boxed]** key

Press the **[Boxed]** key to enter characters marked in blue (yellow ... SF-7000) on the keyboard. When you press the **[Boxed]** key, the indicator **[Boxed]** appears on the display. This indicator disappears as soon as you press the next key.

### Editing text

#### To delete characters

1. Move the cursor to the character to be deleted.
2. Press the **[Del]** key.

SF-7000/75000 → SF-7000/7500

SF-7000 / 75000 \_

#### To insert characters

1. Move the cursor to the position of the character to be inserted.
2. Press the **[Ins]** key to open up a space for the character.
3. Enter the character.

SF-7000/500 → SF-7000/\_7500

7

## To replace characters

1. Move the cursor to the character to be replaced.
2. Enter the desired character.

SF-7000/7000 → SF-7000/7500

SF-7000 / 7000 \_

SF-7000 / 7000 0

SF-7000 / 7500

## Using the Data Management Functions

5

### How the SF-7000/7500 keeps time

- The SF-7000/7500 can display time in 12-hour or 24-hour format. Select which format you wish to use following the procedure on page 127.
- In the 12-hour format, midnight is treated as 12:00 AM, while noon is treated as 12:00 PM. The unit will not accept entry of 0:00 for midnight in the 12-hour format.

The part of the manual tells you how to use the versatile data storage functions of your SF-7000/7500. You will learn how to store, recall, and edit Telephone Directory, Memo, Business Card Library, Memo, and Schedule data. To make procedures as easy to understand as possible, they are explained using actual example operations.

Enter the name.

## Using Combined Search

With Combined Search, you can make more than one specification for the type of data to search for. This reduces the number of items that match the specification, making it quicker and easier to locate specific Telephone Directory data items.

Actually, there are two Combined Search procedures, Direct Combined Search and Random Combined Search.

### To locate data using Direct Combined Search

1. While in the Telephone Directory, press the **[SEARCH]** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for.
2. Enter characters that are at the beginning of an entry in the data item you wish to locate (such as the name, address, telephone number), and press the **[COMBINE]** key.
3. Enter characters that are at the beginning of another entry in the data item you wish to locate, and press the **[SEARCH]** key.
4. The name and telephone number for the person whose Telephone Directory data contains both the entries you specified appear at the top of the display. Press the **[DATA]** key to switch to its Data Display.

**Example:** Locate the Telephone Directory data for an individual named Anderson, whose address begins with the number 1710.

While in the Telephone Directory, press the **[SEARCH]** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for. Enter "1710", and press the **[COMBINE]** key.

**[SEARCH]** 1710 **[COMBINE]**

1710 **[SEARCH]** \_

TEL

Enter "ANDERSON".

**[SEARCH]** ANDERSON

1710 **[SEARCH]** \_

**[CAPS]** TEL

Press the **[SEARCH]** key.

**[SEARCH]**

ANDERSON JACK 234-228-8333

**[CAPS]** TEL **[SEARCH]**

The corresponding name and telephone number appear at the top of the display. Press the **[DATA]** key to switch to the Data Display.

• **[SEARCH]** is the *combine mark* which separates the Combined Search specifications.

• While a combine mark is on the display, the **[SET]** key will not store any data. Delete the combine mark using the **[DEL]** key before pressing **[SET]**.

### To locate data using Random Combined Search

1. While in the Telephone Directory, press the **[SEARCH]** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for.
2. Enter characters that are contained in the data item you wish to locate, and press the **[COMBINE]** key.
3. Enter the second set of characters that are contained in the data item you wish to locate, and press **[SEARCH]** followed by the **[SEARCH]** key.
4. The name and telephone number for the person whose Telephone Directory data contains both the entries you specified appear at the top of the display. Press the **[DATA]** key to switch to the Data Display.

**Example:** Locate the Telephone Directory data for an individual named Diana, who lives in Chicago.

While in the Telephone Directory, press the **SEARCH** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for. Enter "Chicago", and press the **SEARCH** key.

**[CLEAR]** **[SHIFT]** **CHICAGO** **[COMBIKE]**

ChicagoQ\_

Enter "DIANA".

**[CAPS]** **DIANA**

ChicagoQDIANA\_

Press **SHIFT** followed by the **SEARCH**.

**[SHIFT]** **[SEARCH]**

SMITH DIANA  
567-645-3233  
**[CAPS]** TEL

Press **SHIFT** again to display Ken Wilson's data.

**[SHIFT]** **[SEARCH]**

WILSON KEN  
11564 B.C.L. Avenue,  
Los Angeles, CA  
**[CAPS]** TEL

The corresponding name and telephone number appear at the top of the display. Press the **[TOP]** key to change to the Data Display.

## To locate data using Sequential Search

1. Use Index Search, Direct Search, Random Search or Combined Search to display a Telephone Directory data item.
2. Press **SHIFT** followed by **▼** to display the next sequential Telephone Directory item, or **SHIFT** followed by **▲** to display the preceding data item.

**Example:** Use Index Search to display the Telephone Directory data for Jean Palmer, and then move to the data stored for Ken Wilson. Note that you can also use Direct Search, Random Search or Combined Search.

**[TEL]** **▼** **[SHIFT]**  
**[TOP]**

PALMER JEAN 234-228-5421  
2388 S.K. Street, Los Angeles,  
CA

Press **SHIFT** **▼** to display the next item.

**[SHIFT]** **▼**

SMITH DIANA 567-645-3233  
6322 S.F. Avenue, Chicago, IL

**[TEL]**

Press **SHIFT** again to display Ken Wilson's data.

**[SHIFT]** **▼**

WILSON KEN 234-228-4321  
11564 B.C.L. Avenue,  
Los Angeles, CA

**[TEL]**

- In the above operation, you can also access the Telephone Directory by simply pressing the **[TEL]** key after pressing the **[F4]** key. Doing so displays the first (in alphabetical order) Telephone Directory data item.
- In the case of Direct Search, Random Search, and Combined Search, only the data items found and displayed in the Index Display are accessed by the above procedure.

## Using the Business Card Library Function

The Business Card Library function lets you store a wide variety to business-oriented data for, including employer, name, telephone number, position, department, P.O. box, address, telex number and facsimile number. In addition, six user-definable entries are also available for other information.

### Format

Each Business Card Library data item can include up to 384 characters (including separator marks (**▲**) and newline marks (**↓**)). The following shows the format of the data stored for each item.

#### Entry

EMPLOYER
NAME
TEL NUMBER
POSITION
DEPARTMENT
P.O. BOX
ADDRESS
TELEX NUMBER
FAX NUMBER
FREE 1
FREE 6

## To store data in the Business Card Library

1. Press the **[]** key to enter the Business Card Library.
  2. Press the **[]** key. At this time the indicator **[IN]** appears in the lower left of the display to indicate that the SF-7000/7500 is ready for data input.
  3. Press the **[]** key, and the message "EMPLOYER ?" appears to ask you to enter the name of the employer of the individual whose data you are entering. Enter the name of the employer, and then press the **[]** key.
  4. The message "NAME ?" appears to ask you to enter the name of the individual. Enter the name and press the **[]** key again.
  5. The message "TEL NUMBER ?" appears to ask you to enter the telephone number of the employer. Enter the number and press the **[]** key again.
  6. The message "POSITION ?" appears to ask you to enter the position of the individual. Enter the position and press the **[]** key again.
  7. The message "DEPARTMENT ?" appears to ask you to enter the name of the department where the individual works. Enter the name of the department and press the **[]** key again.
  8. The message "P.O.BOX ?" appears to ask you to enter the post office box of the individual. Enter the post office box number and press the **[]** key again.
  9. The message "ADDRESS ?" appears to ask you to enter the address of the employer. Enter the address and press the **[]** key again.
  10. The message "TELEX NUMBER ?" appears to ask you to enter the telex number of the employer. Enter the telex number and press the **[]** key again.
  11. The message "FAX NUMBER ?" appears to ask you to enter the facsimile number of the employer. Enter the number and press the **[]** key to store the data into memory.
- Business Card Library data items are stored in alphabetical order (see page 166) according to the EMPLOYER entry. In the case that more than one individual is registered for a single employer, their data is arranged in alphabetical order according to the NAME entry.
  - If you wish to skip any of the prompted entries, simply press the **[]** key without entering any data.
  - If you press **[]** in place of **[]** after entering the facsimile number in Step 11 above, the message "FREE 1 ?" will appear on the display to ask you for input of user-definable entry number 1.

**Example:** Let us store the data included on the business card illustrated below.

<p style="text-align: center;"><b>DAVID GEAR</b> PRODUCT MANAGER CONSUMER PRODUCTS DIVISION P.O.BOX 7000</p> <p style="text-align: right;">570 MOUNT PLEASANT AVE. DOVER, NJ 07801 PHONE 262-361-5400 TELEX 632754 FACSIMILE 262-361-3819</p> <p style="text-align: center;">CR CO., LTD.</p>

- Any time the current item exceeds the maximum number of 382 characters, further input becomes impossible.

**About newline and separator marks**

- Each time you press the **[P]** key, a newline mark (**▲**) appears on display. The **[SET]** key displays a separator mark (**◆**).
- While a combine mark (**◆**) (see page 41) is on the display, the **[SET]** key will not store any data. Delete the combine mark using the **[DEL]** key before pressing **[SET]**.

## Recalling Business Card Library data

Data stored in the Business Card Library of the SF-7000/7500 can be recalled using one of the following procedures:

- Index Search
- Direct Search

Scrolling through the alphabetical listing of employer names only.

- Random Search

Recall of all items under a name that begins with specific characters.

- Combined Search

Recall of all items according to multiple specifications.

### About the Business Card Library display

Three different display formats are used in the Business Card Library.

- Employer Name Display

This format shows employer names only.

- Data Display

This format shows all of the data entered for one individual.

- Name/Number Display

This format shows individual names and telephone numbers only.

### Employer Name Display

----------------------------	-----------	------------------

<b>Data Display</b> ↓  ↑	CBA ELECTRONICS CO., LTD. GEAR MIKE PRODUCT MANAGER CONSUMER PRODUCT DIVISION ▼ Unit 6, 1000 NORTH CIRCULAR ROAD	<b>BUSI CARD</b>
--------------------------	--	------------------

As shown here, you can switch between the Employer Name Display and Data Display by pressing the key.

- The ▼ indicator on the left of the display indicates that more data is present off of the bottom of the display. Press the □ key to view this data. Likewise, a ▲ indicator will also appear when there is more data off of the top of the display. In this case, press the □ key to view the data. The □ key is used to switch between the Name/Number Display and the Data Display following Direct Search, Random Search, or Combined Search.

### **Before trying the examples in this section....**

- The message "DATA ITEM NOT FOUND!" appears on the display if you attempt to search for text that does not exist in memory. This may be because the item does not exist, or because you made a mistake when entering the text to be searched for.  
Should this message appear, press the □, □ to recall and edit the text you input, or the □ key to reenter the text from the beginning. Or you can press the □ or □ key to enter directly into the Employer Name Display.
- If you try to recall data when no data is stored in memory, the message "DATA ITEM NOT FOUND ! NO RECORD !" appears on the display. In this case, press the □ key to return to the initial Business Card Library display.
- If you have a large number of data items stored in memory, the search procedure may take a long time. You may cancel any search procedure in progress by pressing the □ key.
- The examples used to explain the procedures in this section are based upon the following Business Card Library data. If you wish to follow along and perform the operations as they are explained, enter the data listed below using the procedures described in **To store data in the Business Card Library**.

## To locate data using Index Search

1. Press the **[<sub>SEARCH</sub>]** key to enter the Business Card Library. The first display to appear tells you how many data items are stored, and how many of the data items are marked.
2. Press the **[<sub>▼</sub>]** key. An Employer Name Display of the first six employer names appears.
3. Press the **[<sub>▼</sub>]** key to scroll down one item at a time, and the **[<sub>▲</sub>]** key to scroll up.
4. Press **[<sub>SWI</sub>]** followed by **[<sub>▼</sub>]** to scroll down an entire page (of six names) at a time, or **[<sub>SWH</sub>]** followed by **[<sub>▲</sub>]** to scroll up page-by-page.
5. To select one of the names, position it so that it is in the first line at the top of the display.
6. Press the **[<sub>DATA</sub>]** key to view the Data Displays for the selected employer.

**Example:** Search for the Business Card Library data stored for QD Motors.

Press the **[<sub>SEARCH</sub>]** key to enter the Business Card Library.

**BUSI CARD**

If you press the **[]** key again, the Employer Name Display will reappear with "QD MOTORS" at the top.

## To locate data using Direct Search

1. While in the Business Card Library, press the **[]** key. The message "SEARCH FOR ?" appears to ask you the name of the person whose data you wish to locate.
2. Enter the name of the person whose data you wish to view, and press the **[]** key.
3. A Name/Number Display appears with the name and telephone number for the person you specified at the top. Press the **[]** key to change to the Data Display.

Example: Search for the Business Card Library data stored for Carlos Gomez.

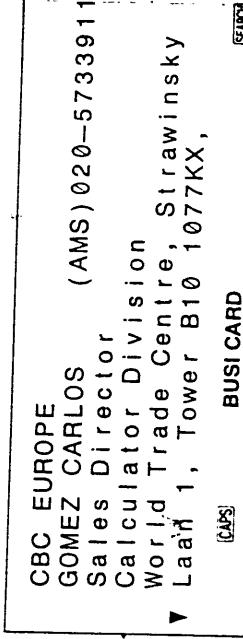

Anytime you press the **[]** key in the Business Card Library, the message "SEARCH FOR ?" appears to ask you for the name you wish to locate. Enter the name "GOMEZ".

**[]** **GOMEZ** **[]** **GOMEZ\_**

Press the **[]** key and the **[]** symbol appears in the lower right of the display. A Name/Number Display shows the name and telephone number for the name that you specified at the top.

**[]** **GOMEZ CARLOS (AMS) 020-5733911** **[]** **GOMEZ CARLOS (AMS) 020-5733911**

Press the [DATA] key to switch to the Data Display.

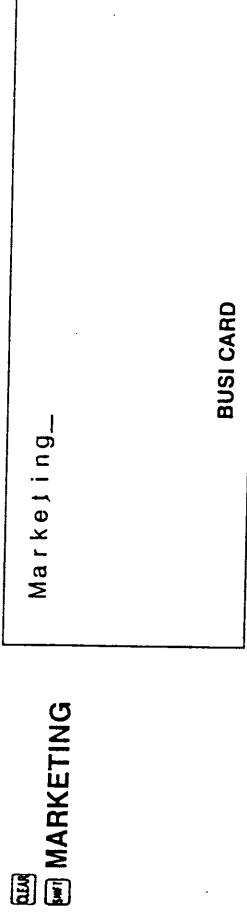

- When the total number of characters making up the name and telephone number is greater than 32, only the name is displayed in the Name/Number Display. If the name itself exceeds 32 characters, only its first 32 characters are shown on the Name/Number Display.
- The above procedure can also be performed specifying "GOMEZ CARLOS", or simply "G".
- If more than one Business Card Library item matches the specification you enter for "SEARCH FOR?", they will appear together on Name/Number Display. Use the [▲] and [▼] keys to select one of the displayed names by positioning it in the top line of the display, and then press the [DATA] key to switch to its Data Display.

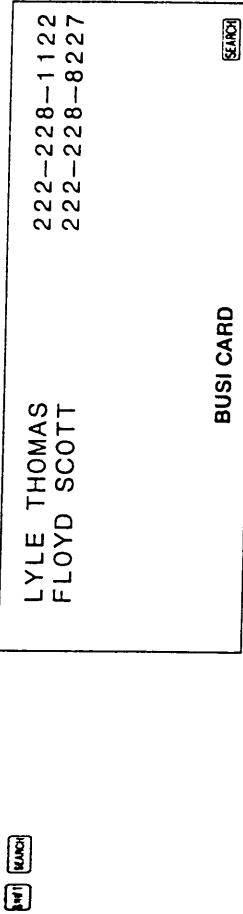

### To locate data using Random Search

1. While in the Business Card Library, press the [SEARCH] key. The message "SEARCH FOR?" appears to ask you what to search for.
2. Enter the text you wish to search for, and press [SEARCH] followed by the [SEARCH] key.
3. The names and telephone numbers for all of the persons whose data items contain the text you specified appear as a Name/Number Display.
4. Use the [▲] and [▼] keys to select one of the displayed names by positioning it in the top line of the display, and then press the [DATA] key to switch to its Data Display.

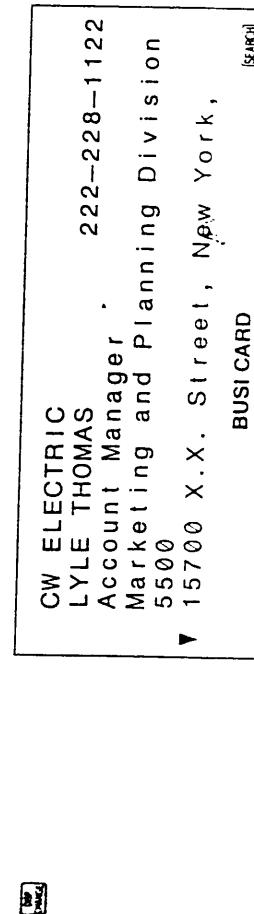

Example: Search for all of the Business Card Library data items that contain the text "Marketing".

While in the Business Card Library, press the [SEARCH] key. The message "SEARCH FOR?" appears to ask you what to search for. Enter "Marketing".

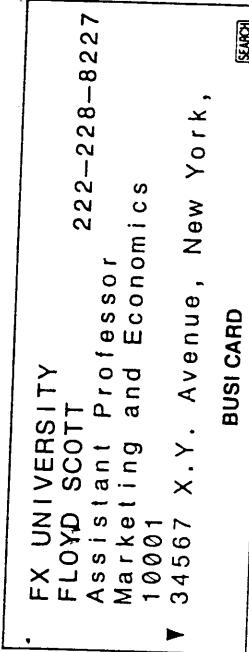

Press [SEARCH] followed by the [SEARCH] key. The [SEARCH] indicator appears on the display, and the names and telephone numbers for all of the persons whose data items contain the text you specified appear as a Name/Number Display.

CW ELECTRIC  
LYLE THOMAS  
Account Manager  
Marketing and Planning Division  
5500  
▼ 15700 X.X. Street, New York  
[SEARCH] BUSI CARD

Press the **[▼]** key to view the data off of the bottom of the display. You can also press **[SWF]** followed by **[▼]** to switch to the next individual's Data Display, or **[SWF]** **[▲]** to switch to the previous individual's Data Display.

### Using Combined Search

With Combined Search, you can make more than one specification for the type of data to search for. This reduces the number of items that match the specification, making it quicker and easier to locate specific Business Card Library data items.

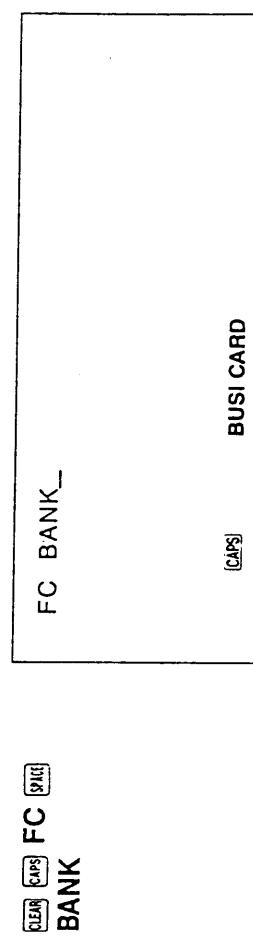

Actually, there are two Combined Search procedures, Direct Combined Search and Random Combined Search.

### To locate data using Direct Combined Search

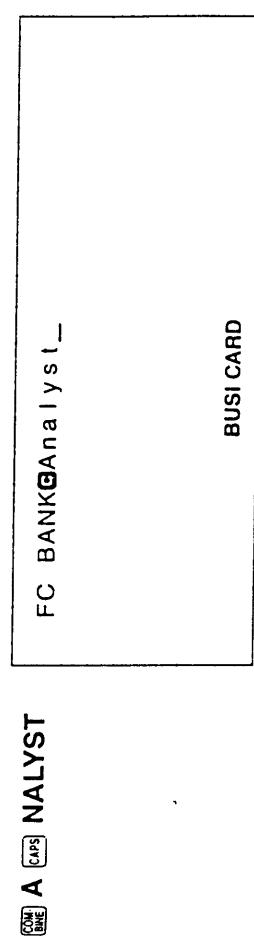

1. While in the Business Card Library, press the **[CLEAR]** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for.
2. Enter characters that are at the beginning of an entry in the data item you wish to locate (such as the employer, or position), and press the **[CLEAR]** key.
3. Enter characters that are at the beginning of another entry in the data item you wish to locate, and press the **[CLEAR]** key.
4. The name and telephone number for the person whose Business Card Library data contains both the entries you specified appear at the top of the display. Press the **[DATA]** key to switch to the Data Display.

Example: Locate the Business Card Library data for all analysts at the FC Bank.

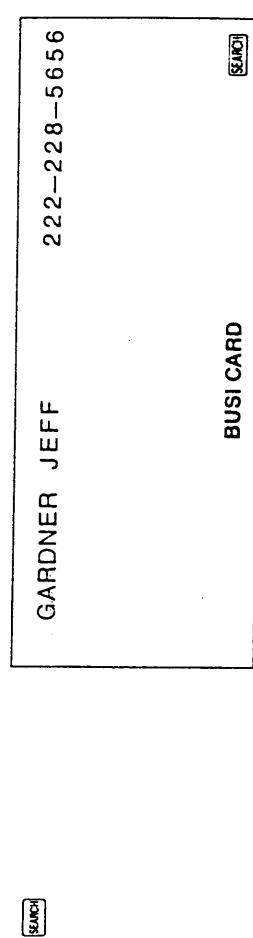

While in the Business Card Library, press the **[CLEAR]** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for. Enter "FC BANK".

Press the **[COMBINE]** key and enter "Analyst".

Press the **[SEARCH]** key.

The corresponding name and telephone number appear at the top of the display. Press the **[DATA]** key to switch to the Data Display.

## To locate data using Random Combined Search

1. While in the Business Card Library, press the **[CLEAR]** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for.
2. Enter characters that are contained in the data item you wish to locate, and press the **[CLEAR]** key.
3. Enter the second set of characters that are contained in the data item you wish to locate, and press **[CLEAR]** followed by the **[SEARCH]** key.
4. The name and telephone number for the person whose Business Card Library data contains both the entries you specified appear at the top of the display. Press the **[DATA]** key to switch to the Data Display.

**Example:** Locate the Business Card Library data for all individuals who work in the advertising industry in New York.

While in the Business Card Library, press the **[CLEAR]** key. The message "SEARCH FOR ?" appears to ask you the data you wish to search for. Enter "New York".

**CLEAR** **SHTF** **NEW** **[DATA]**  
**SHTF** **YORK**

New York\_

**BUSI CARD**

Press the **[DATA]** key and enter "Ad".

**CLEAR** **SHTF** **AD**

New York**AD**\_

**BUSI CARD**

Press **[DATA]** followed by the **[SEARCH]** key.

**CLEAR** **SHTF** **ROBINSON** **LUCY**  
**SHTF** **[SEARCH]**

The corresponding name and telephone number appear at the top of the display. Press the **[DATA]** key to change to the Data Display.

# Using the Memo Function

Press the **MEMO** key to show the initial Memo display.

The Memo function lets you store such data as timetables, price lists and general memorandum.

## Format

Each Memo data item can include up to 384 characters (including newline marks (+)).

## To store data in the Memo Mode

1. Press the **MEMO** key to enter the Memo Mode.
2. Press the **MEMO** key. At this time the indicator **[IN]** appears in the lower left of the display to indicate that the SF-7000/7500 is ready for data input.
3. Press the **MEMO** key, and the message "MEMO ?" appears to ask you to enter the memo data.
4. Enter the data as you wish.
5. Press the **SET** key to store the data into memory. Memo data items are stored as they are entered, without being sorted.

**Example:** Let us store the following subway timetable in memory.

SUBWAY TIMETABLE					
7:00	05	14	22	30	41
8:00	08	16	24	33	42
9:03	12	20	29	38	46
10:05	14	23	32	41	50
11:07	16	25	34	43	51
12:08	17	26	35	43	53

Enter the first line.

MEMO			

Press the **MEMO** key on the display to indicate that the SF-7000/7500 is ready for data input.  
Press the **CLEAR** key, and the message "MEMO ?" appears to ask you to enter memo data.

MEMO ?			
<b>[IN]</b>			
MEMO			

Proceed as described below.

## About the Memo display

- Two different display formats are used for memos.
- Index Display

- This format shows only the first lines of all memos currently stored in memory. We will refer to these as *memo names*.
- Data Display
- This format shows all of the data entered for one memo item.

Index Display			
<b>SUBWAY TIMETABLE</b> PRICE LIST (TAX FREE) CREDIT CARD NUMBERS PASSPORT NUMBER AIRLINE SCHEDULE — N.Y.~TOKYO AIRLINE SCHEDULE — TOKYO~LONDON  <b>MEMO</b>			

Data Display			
<b>SUBWAY TIMETABLE</b> 7:00 05 14 22 30 41 52 8:00 08 16 24 33 42 55 9:03 12 20 29 38 46 56 10:05 14 23 32 41 50 58 11:07 16 25 34 43 51 59 12:08 17 26 35 43 53 —  <b>MEMO</b>			

After you complete entering the data press the **[SET]** key to store this data item into memory.

### About newline mark

Each time you press the **[J]** key, a newline mark (**¶**) appears on display.

## Recalling Memo data

Data stored in the Memo Mode of the SF-7000/7500 can be recalled using one of the following procedures:

- Index Search
- Scrolling through a list of the first lines of each data item stored.
- Direct Search
- Recall of all items with a specific first line.
  - Random Search
  - Recall of all items that contain specific characters.
  - Sequential Search
  - Scrolling through data items.

## Before trying the examples in this section....

- The message "DATA ITEM NOT FOUND!" appears on the display if you attempt to search for text that does not exist in memory. This may be because the item does not exist, or because you made a mistake when entering the text to be searched for.
- Should this message appear, press the □, ▢, or ▣ key, and enter the text to be searched for again. Or you can press the ▲ or ▨ key to enter directly into the Index Display.
- If you try to recall data when no data is stored in memory, the message "DATA ITEM NOT FOUND ! NO RECORD !" appears on the display. In this case, press the □ key to return to the initial Memo display.
- The examples used to explain the procedures in this section are based upon the following Memo data. If you wish to follow along and perform the operations as they are explained, enter the data listed below using the procedures described in **To store data in the Memo Mode**.

## To locate data using Index Search

- Press the □ key to enter the Memo Mode. The first display to appear tells you how many data items are stored, and how many of the data items are marked.
  - Press the ▨ key. An Index Display appears which contains the first lines of memos (memo names).
  - Press the ▨ key to scroll down one memo name at a time, and the □ key to scroll up.
  - Press □ followed by ▨ to scroll down an entire page (of six memo names) at a time, or □ followed by ▨ to scroll up page-by-page.
  - To select one of the memos, position its name so that it is in the first line at the top of the display.
  - Press the ▣ key to view the Data Display for the selected memo.
- Example:** Search for the Memo data stored under the name "PLAN B".

Press the □ key to enter the Memo Mode.

## Inserting a memo between two existing memos

Generally, memos are stored in the same sequence that they are entered. The following operation makes it possible for you to enter a new memo between two existing memos.

### To insert a memo between two existing memos

1. In the Index Display, position the memo that you wish to follow the new memo at the top line of the display.
2. Press the **[<sup>MEM</sup>]** key. [**IN**] appears on the display to indicate that the SF-7000/7500 is ready for data input.
3. Enter the new memo.
4. Press **[<sup>MEM</sup>]** followed by **[SET]** to store the new memo before the memo you selected in Step 1 above.

**Example:** Enter the data listed below into a memo before the memo named "PASSPORT".

CREDIT CARD NUMBERS	Casio Credit 12345 Digital Credit 98765
---------------------	--

Recall the list of memo names using Index Search.

[IN] MEMO

- If you press [SET] only instead of [DATA] [SET] to store the above memo, it will automatically be stored as the last memo on the Index Display list.
- Note that the position that you select to insert a memo is cleared if you press the [DATA] key while you are entering the new memo. If, after you press [CLEAR], you resume entering the new memo and then press [SHIFT] [SET], the new memo will be stored as the last memo on the Index Display list.
- Data items may be inserted between other data items. You cannot insert a data item into another data item.

## Using the Calendar Function

The Calendar function gives you instant access to any full month calendar from January 1901 through December 2099. The SF-7000/7500's wide display shows two calendars simultaneously.

### Displaying a calendar for a specific month

There are three methods that you can use to display the calendar for a specific month.

- Current date calendar  
This method displays the calendar for the month that contains the current date.
- CAL mode specification  
You can specify a month while the SF-7000/7500 is in the CAL mode.
- Calendar display specification  
Any month that you specify while the SF-7000/7500 is displaying a calendar appears instantly.

### To display the current date's calendar

Each time you press the [CAL] key, the calendar for the month that contains the current date appears automatically on the display.

**Example:** Press the [CAL] key (assuming that today's date is October 10, 1989).

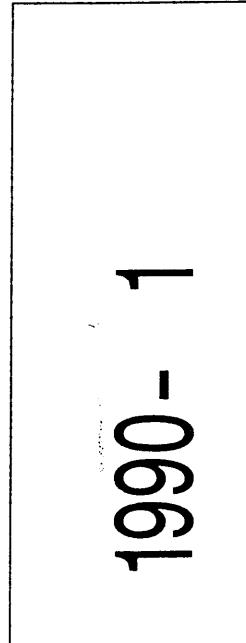

SU	MO	TU	WE	TH	FR	SA	SU	MO	TU	WE	TH	FR	SA
10	1	2	3	4	5	6	7	11	5	6	7	8	9
8	9	10	11	12	13	14	1	2	3	4	11	12	13
15	16	17	18	19	20	21	12	13	14	15	16	17	18
22	23	24	25	26	27	28	19	20	21	22	23	24	25
29	30	31					26	27	28	29	30		

- 1989 - ^

- The current date is based upon the current HOME TIME setting (see page 121 for details).

## To specify a month in the CAL mode

1. While the SF-7000/7500 is in the CAL mode (see page 175), specify the year and month.
  2. Press the **[CAL]** key.
- Example:** Recall January — February 1990.
- CAL** **90** **[DATE]** **1**
- 

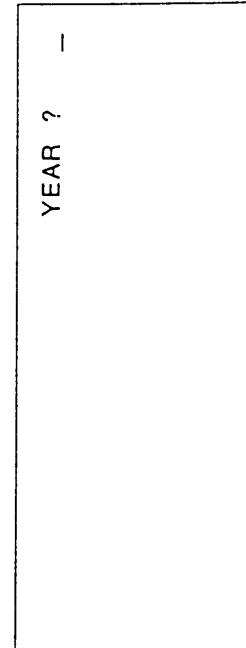

Press the **[DATE]** key.

SU	MO	TU	WE	TH	FR	SA	SU	MO	TU	WE	TH	FR	SA
1	2	3	4	5	6	7	2	4	5	6	7	8	9
7	8	9	10	11	12	13	14	15	16	17	18	19	20
14	15	16	17	18	19	20	21	22	23	24	25	26	27
21	22	23	24	25	26	27	28	29	30	31	—	1990	—
28	29	30	31				25	26	27	28			

**Example:** Display the calendars for July and August 1989.

Press the **[CLEAR]** key.

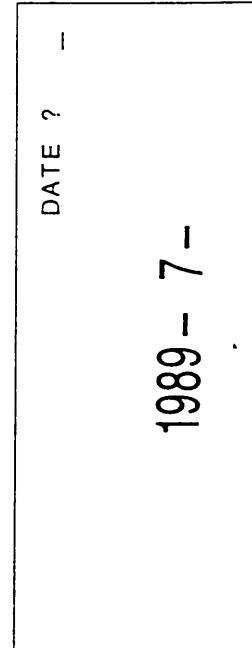

YEAR ? —

DATE ? —

**89** **[DATE]** **7** **[DATE]**

**1989- 7 -**

- In Step 1 above, you can also enter a date. If you do, the date will be selected and flashing when the calendar appears. See page 86 for details.
- You can stop the date from flashing on the calendar by pressing the **[CLEAR]** or **[RET]** key.
- Years in the 20th century may be entered using the last two digits only (1989→89), but 21st century years must be entered in four digits.

## To specify a month in the Calendar display

1. While a calendar is displayed, press the **[CLEAR]** key. The message “YEAR ?” appears on the display to ask for input of a year.
2. Enter a year and press the **[CLEAR]** key. Next, the message “MONTH ?” appears on the display to ask for input of a month.
3. Enter the month and press the **[CLEAR]** key again.
4. Press the **[CLEAR]** key to display the specified calendar.

- Following Step 2 above, you can also enter a date. If you do, the date will be selected and flashing when the calendar appears. You can stop the date from flashing on the calendar by pressing the **[CLEAR]** or **[RET]** key. See page 86 for details.

Press the **[F1]** key to display the specified calendar.

SU	MO	TU	WE	TH	FR	SA
7	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31	—	1989	—	1989

## Accessing a schedule data item from a calendar

### To scroll through calendars

1. Press the **[▼]** key to scroll forward month-by-month through the calendars, and the **[▲]** key to scroll back.
2. Press **[F1]** followed by **[▼]** to scroll forward page-by-page (two months per page) through the calendars, and **[F1]** **[▲]** to scroll back.

Example:

SU	MO	TU	WE	TH	FR	SA
11	1	2	3	4	12	1
12	5	6	7	8	9	10
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	—	1989	—
31	—	—	—	—	—	1990

SU	MO	TU	WE	TH	FR	SA
12	3	4	5	6	7	8
10	11	12	13	14	15	16
17	18	19	20	21	22	23
24	25	26	27	28	29	30
31	—	—	—	—	—	1990

### To select a date using the cursor keys

1. Locate the calendar that contains the date you wish to select on the left side of the SF-7000/7500's display. You can only select dates in the calendar on the left side of the display.
2. Press the **[◀]** cursor key to make the first date of the month flash, or the **[▶]** cursor key to make the last date of the month flash. The date that is flashing is called the *currently selected date*.

3. Use the cursor keys to change the currently selected date.

- Moves the cursor to the date preceding the current selection. If the currently selected date is the first date of the month, pressing this key enters the preceding month.
- Moves the cursor to the date following the current selection. If the currently selected date is the last date of the month, pressing this key enters the following month.
- Moves the cursor one week back. If the currently selected date is in the first week of the month, pressing this key enters the preceding month.
- Moves the cursor one week forward. If the currently selected date is in the last week of the month, pressing this key enters the following month.

- Holding down any of the cursor keys changes the currently selected date at high speed.
- You can stop the date from flashing on the calendar by pressing the **[SET]** or **[IN]** key.

### To select a date by entering a value

1. Locate the calendar that contains the date you wish to select on the left side of the SF-7000/7500's display. You can only select dates in the calendar on the left side of the display.
2. Use the numeric keys to input the date you wish to select. The date that corresponds to the number you input immediately begins to flash. It is the *currently selected date*.

- You can also select dates by entering the date you wish to select when specifying a month in the CAL mode (page 82) or the Calendar display (page 83).

### To highlight holidays and special dates

1. Select the date that you wish to highlight.
2. Press the **[SET]** key. **[IN]** appears on the display to indicate that the SF-7000/7500 is ready for input.
3. Press the **[SET]** key to highlight the currently selected date.

**Example:** To highlight July 8 and 22, 1989.

Select July 8.

**[HLD]** **[SET]** **89** **[DATE]**  
**7** **[DATE]** **[IN]**  
**[▼] (or enter 8)**

SU	MO	TU	WE	TH	FR	SA	SU	MO	TU	WE	TH	FR	SA

29	30	31	-	1989	-	
[IN]						

## Working day counts

After you highlight holidays on the calendar display, you can then automatically count the number of working days in a specific period.

### To count the number of working days

1. Select the date from which you wish to begin your count.
2. Press the **[IN]** key. The currently selected date will become a black box “■” to mark the start of the count. On the right side of the display, the start date and the currently selected date (which at this time will be identical) are displayed. The large number (0 at this time) indicates the number of working days (unhighlighted dates) from the start date up to the currently selected date.
3. Use the cursor keys to select a new date. As the currently selected date changes, the number of working days changes accordingly. If the currently selected date precedes the start date, the number of working days will be displayed as a negative value.
4. You can change the start date to the currently selected date by simply pressing the **[IN]** key.
5. To exit the working date count, press the **[IN]** key or **[C]** key.

### To clear the highlights from a series of months

1. Press the **[IN]** key to enter the Calendar display.
2. Locate the calendar whose highlights you wish to clear on the left side of the display.
3. Press the **[IN]** key. **[IN]** appears on the display to indicate that the SF-7000/7500 is ready for input.
4. Press the **[IN]** key.
5. Press **[2]** to select “ONE-MONTH HIGHLIGHT CLEAR”.
6. Press **[Y]** to clear all of the date highlights from the month, or **[N]** to cancel the operation and return to the display in Step 3 above.

Example: Count the number of working days from July 6, 1989 through August 15, 1989, if all Saturdays and Sundays are highlighted as holidays.

**[C]** **[CLEAR]** **89**  
**[DATE]** **7** **[C]**

SU	MO	TU	WE	TH	FR	SA
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	-	1989	-	
[IN]						

Example: Count the number of working days from July 6, 1989 through August 15, 1989, if all Saturdays and Sundays are highlighted as holidays.

1. Press the **[IN]** key to enter the Calendar display.
2. Press the **[IN]** key. **[IN]** appears on the display to indicate that the SF-7000/7500 is ready for input.
3. Press the **[IN]** key.
4. Press **[1]** to select “MULTIPLE MONTH HIGHLIGHT CLEAR”.
5. Enter the date up to which you want to clear the highlights. Enter the year and press the **[IN]** key, then the month followed by the **[IN]** key.
6. Press **[Y]** to clear date highlights for the specified period, or **[N]** to cancel the operation and return to the display in Step 2 above.

Select July 6.

(or enter 6)

SU	MO	TU	WE	TH	FR	SA
						1
7	2	3	4	5	6	7
14	10	11	12	13	14	15
21	17	18	19	20	21	22
28	24	25	26	27	28	29
-	31	-	1989	-		

Press the **DATE** key to specify July 6 as the start date.

**DATE**

SU	MO	TU	WE	TH	FR	SA
						1
7	2	3	4	5	6	7
14	10	11	12	13	14	15
21	17	18	19	20	21	22
28	24	25	26	27	28	29
-	31	-	1989	-		

Move the cursor to August 15.

SU	MO	TU	WE	TH	FR	SA
						5
8	6	7	8	9	10	11
15	13	14	15	16	17	18
22	20	21	22	23	24	25
29	27	28	29	30	31	1989
-	-	-	-	-	-	-

According to this display, there are 28 working days in the specified periods.

- If you press the **DATE** key while the above display is shown, August 15 becomes the start date.
- When moving the cursor to count the number of working days, highlighted dates cannot be selected.

## Using the Schedule Keeper

The Schedule Keeper function works in combination with the Calendar to help keep track of your appointments. Once you make a Schedule Keeper entry, the date of that entry is marked on the calendar to indicate that you have an AM or PM appointment. In addition, an innovative Timetable Display shows you at a glance what time frames throughout the day are filled and which are open.

### Format

Each Schedule Keeper data item can include up to 384 characters (including newline marks (**\n**)). Items are made up of time and remarks.

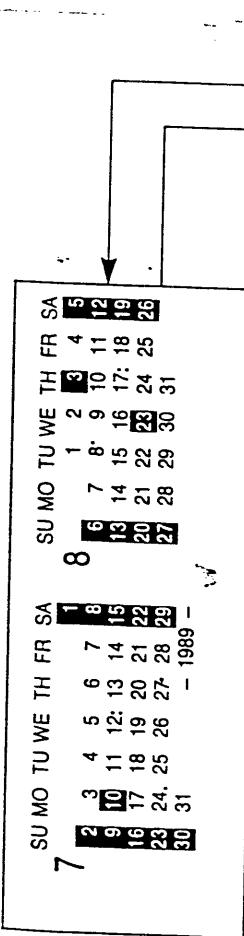

Date
Time
Remarks

### About Schedule Keeper displays

Three different display formats are used in the Schedule Keeper.

- Calendar display markers  
Dates that have Schedule Keeper data assigned are automatically marked. The upper mark indicates a morning appointment, while the lower mark indicates an afternoon appointment.

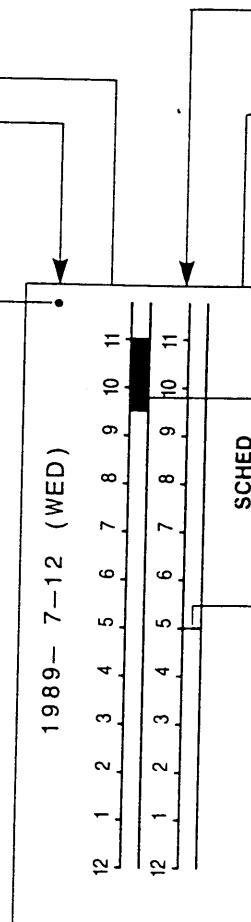

- The ▼ indicator on the left of the display indicates that more data is present off of the bottom of the display. Press the [▼] key to view this data. Likewise, a ▲ indicator will also appear when there is more data off of the top of the display. In this case, press the [▲] key to view the data.
- Press [SCROLL] to switch from the Calendar Display to the Timetable Display, and the [DATA] key to switch from the Timetable Display to the Calendar Display.
- Use the [DATA] key to switch between the Timetable Display and the Data Display.
- The Timetable Display and Data Display will use either 12-hour or 24-hour format, depending on the setting you make for the Home Time (see page 127).

• Timetable Display

The Timetable Display shows at a glance when appointments are scheduled throughout an entire day.

Indicates no time included with appointment

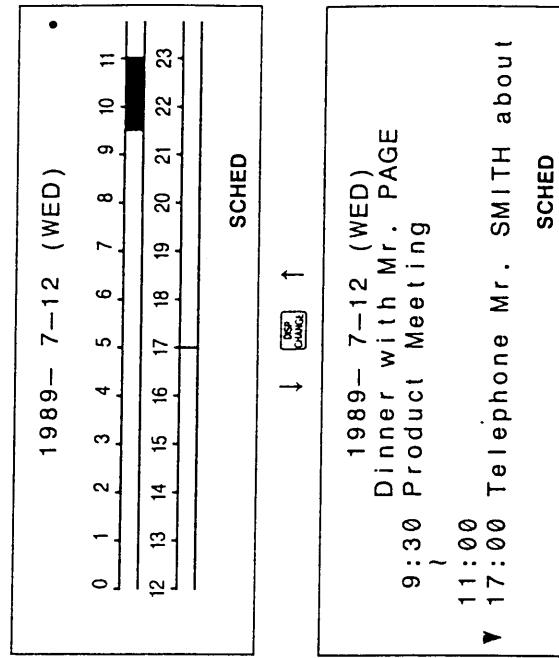

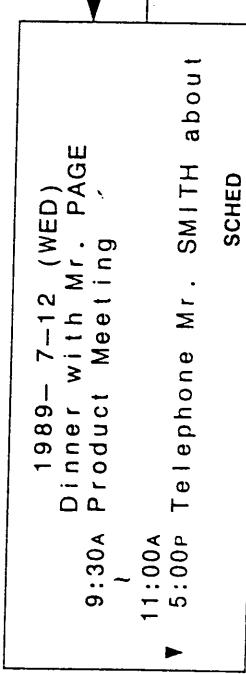

Appointment at 5:00 PM — Appointment from 9:30 AM to 11:00 AM

- If a date is highlighted on the calendar (see page 87), the name of the day of the week is included in [square brackets] instead of (parentheses).

• Data Display

This display contains all of the details for the appointments.

- 1989 - 7-12 (WED)  
Dinner with Mr. PAGE  
9:30 Product Meeting
- 11:00 Telephone Mr. SMITH about
- 17:00 SCHED

## Schedule Keeper

When you enter the Schedule Keeper, you have to enter for a specific date. There are three methods that you can use to specify the date when entering the Schedule Keeper.

### Date specification

Enter the date that you wish to access. You can also specify the date while the SF-7000/7500 is in the CALE mode.

#### Selection from the Calendar

- Sequential selection

Scroll through the dates to find the one you wish to access.

### To specify a date

- Press the **DATE** key. At this time the current date's Timetable Display appears.

- The current date is based upon the current HOME TIME setting (see page 121 for details).
- Press **SWI** followed by the **DATE** key. The message "YEAR ?" appears to ask you what year the schedule you wish to access is in.
- Enter the year and press the **DATE** key. The message "MONTH ?" appears to ask you the month of your schedule.
- Enter the month and press the **DATE** key. Now the SF-7000/7500 asks for the date.
- Enter the date and press the **DATE** key. The Timetable Display for the date you specify will appear.

**Example:** Specify the schedule for July 24, 1989.  
Press the **DATE** key, and enter the date. Press the **DATE** key after each entry.

**DATE**  
**CLEAR**  
**89** **DATE** **7** **DATE** **24**  
**DATE**

1989 - 7 - 24 (MON)											
12	1	2	3	4	5	6	7	8	9	10	11
12	1	2	3	4	5	6	7	8	9	10	11
SCHED											

### To specify the date in the CAL mode

- While in the CAL mode (press the **AT** key to enter), enter the year, month, and date, pressing the **DATE** key after each entry.
- After entering the date, press the **SWI** key to switch directly to the Timetable Display for that date.

### To select a date from the Calendar

- Display the calendar that contains the date whose schedule you wish to access, and select the date (see page 85 for details on selecting dates).
- Press the **SWI** key and the Timetable Display for the selected date appears.

**Example:** Select July 3, 1989, and then July 18, 1989.

Display the calendar for July 1989, and select the 3rd.

**DATE** **►** **►**  
(or enter 3)

## Entering data into the Schedule Keeper

Entering data into the Schedule Keeper is actually quite simple. Rather than attempting to explain it before providing an example, let's go straight into the example to see how it is done.

Let us say that we wish to enter the following information into the Schedule Keeper. This example assumes that 12-hour format is being used (see page 26).

Year	Date	Time	Remarks
1989	7/20	10:00 AM	Planning Meeting
1989	7/20	2:00 PM	New Product Campaign
1989	7/24	9:30 AM	Breakfast with Mr. LEE
1989	7/26	10:00 AM	Discussion about B-PROJECT
1989	7/26	1:00 PM ~ 3:00 PM	Department Meeting (Room 105)
1989	7/26		Meet Mr. McDONALD at A.B. HOTEL

Press the **[DATE]** key to enter the Schedule Keeper. Press **Shift [CLEAR]**, and enter the year, month and date, pressing the **[DATE]** key after each entry (see Entering the Schedule Keeper for details).

**[DATE]** **Shift [CLEAR]**

YEAR ? -

Enter the time and then press the **[TIME]** key.

After you complete all of the entries, press the **[CLEAR]** key again to exit data input.

- Appointments are automatically stored in according to time, regardless of the sequence that they are entered.
- Appointments scheduled for the same date are stored according to their times. Entries that do not include a time are stored before the entries that include times.
- See page 142 for details on editing and deleting appointment entries.

Enter the next appointment. Note that this appointment has no time entry, but this presents no problem.

12	1	2	3	4	5	6	7	8	9	10	11
M	CDONALD	AT	CAPS	A.B.HOTEL	SET						
<b>SCHED</b>											

After you complete all of the entries, press the **[CLEAR]** key again to exit data input.

### Recalling Schedule Keeper data

Data stored in the Schedule Keeper of the SF-7000/7500 can be recalled using one of the following procedures:

- Date Search  
Input a date to enter the Schedule Keeper for that date.
- Calendar Search  
Select a date on the calendar to enter the Schedule Keeper for that date.
- Direct Search  
Enter the time or text to locate all appointments with entries that begin with the specified time or text.
- Random Search  
Enter a time or details to locate all appointments contain any data that include the specified time or text.

1	2	3	4	5	6	7	8	9	10	11	12
1:00P	SCHEDULE	?									
3:00P											
<b>SCHED</b>											

Next enter the afternoon appointment. Note the key operation used to enter the starting time and ending time.

1	2	3	4	5	6	7	8	9	10	11	12	
D	EPARTMENT	MEETING	?	ROOM	105	SET						
<b>SCHED</b>												

Now enter the details of the afternoon appointment.

## Before trying the examples in this section....

- The message "DATA ITEM NOT FOUND!" appears on the display if you attempt to search for text that does not exist in memory. This may be because the item does not exist, or because you made a mistake when entering the text to be searched for.  
Should this message appear, press the **◀**, **▶** to recall and edit the text you input, or the **ENTER** key to reenter the text from the beginning. Or you can press the **◀** or **▶** key to enter directly into the Timetable Display.
- If you try to recall data when no data is stored in memory, the message "DATA ITEM NOT FOUND! NO RECORD!" appears on the display. In this case, press the **ENTER** key to return to the initial Schedule Keeper display.

- Direct Search and Random Search try to find the nearest data items in the future that contain the text you specify. When there are no future data items, it starts from the nearest item in the past and searches up to the current date.
- If you have a large number of data items stored in memory, the search procedure may take a long time. You may cancel any search procedure in progress by pressing the **ENTER** key.

## Date Search

- Press the **ENTER** key to enter the Schedule Keeper, and press **SUPER** followed by the **ENTER** key.
- Enter the year, month, and date that you wish to access, pressing the **ENTER** key after each entry.
- To change from the Timetable Display to the Data Display, press the **ENTER** key.

**Example:** Check the schedule for July 26, 1989.

Press the **ENTER** key to enter the Schedule Keeper, and then press **SUPER** **CLEAR**.  
**YEAR** ? -

**SUPER** **CLEAR**

1989	7	26	(WED)								
12	1	2	3	4	5	6	7	8	9	10	11
12	1	2	3	4	5	6	7	8	9	10	11
SCHED											

- Enter the year, month, and date, pressing the **ENTER** key after each entry.

**89** **ENTER** **7** **ENTER** **26** **ENTER**

1989	7	26	(WED)								
12	1	2	3	4	5	6	7	8	9	10	11
12	1	2	3	4	5	6	7	8	9	10	11
SCHED											

- Press the **DATA** key to switch to the Data Display for the specified date.

**DATA**

- If you press **▼** after you reach the last Schedule Keeper entry for this date, the following date's schedule appears. If you press **SUPER** **▼** after reaching the last Schedule Keeper entry for this date, the SF-7000/7500 will skip all dates that do not contain any data and jump to the next date that contains **SUPER** **▼** does not change the current display.

## Calendar Search

1. Display the calendar that contains the date that you wish to access on the left side of the display and select the date.
2. Press the **[SEARCH]** key to enter the Schedule Keeper, and display the Timetable Display for the currently selected date.
3. To change from the Timetable Display to the Data Display, press the **[DATA]** key.

**Example:** Check the schedule data for July 24, 1989.

Select the date on the Calendar display.

**[CLEAR]** **89**

## Using Direct Search

With direct search, you can specify either text or a time to locate the Schedule Keeper information you want.

### To search for text

1. Press the **[SEARCH]** key to enter the Schedule Keeper.
2. Press the **[CLEAR]** key. The message "SEARCH FOR ?" appears to ask you what text you wish to search for.
3. Enter the text and press the **[SEARCH]** key.
4. The first Schedule Keeper item that includes the specified text at the beginning of an entry appears on the display. Press **[NEXT]** followed by the **[▼]** or **[▲]** key to view other data items that match the specification (displayed in chronological order). If the display is not changed by the operation, there are no more entries that match.

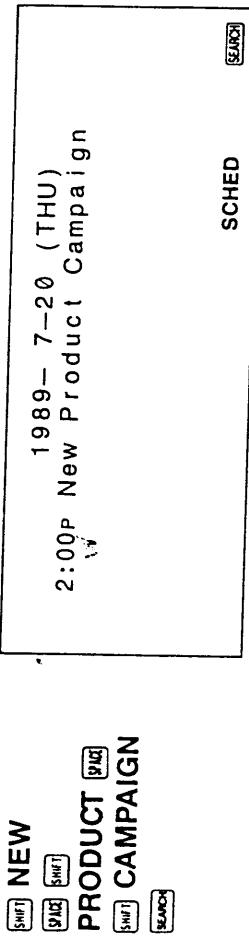

**Example:** Find all of the entries that begin with the words "New Product Campaign".

Press the **[SEARCH]** key to enter the Schedule Keeper and then press the **[CLEAR]** key.

1989- 7-18 (TUE)
SEARCH FOR ?

**SCHED**

- The date at the top of this display is the current date.
- Enter the text "New Product Campaign", and press the **[<sub>SEARCH</sub>]** key.
- Note that you could also enter just the word "New" or "N" for the search.

The **[<sub>SEARCH</sub>]** indicator appears on the display and the first entry that matches the specified text appears on the display.

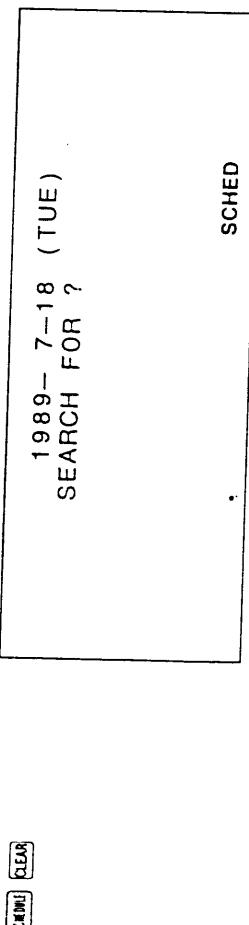

- You can press the **[<sub>SEARCH</sub>]** key when you find the entry you want to exit the search function.

### To search for times

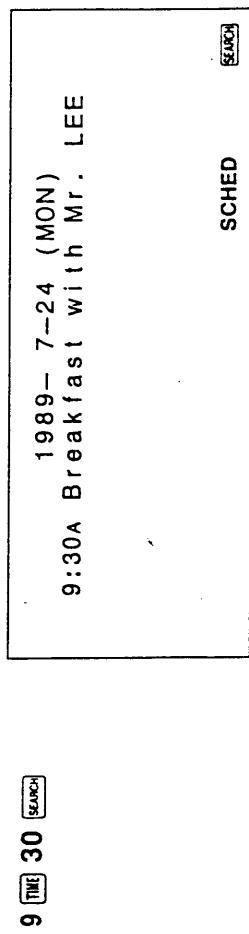

- Press the **[<sub>SEARCH</sub>]** key to enter the Schedule Keeper.
- Press the **[<sub>SEARCH</sub>]** key. The message "SEARCH FOR ?" appears to ask you what to search for.
- Enter the time and press the **[<sub>SEARCH</sub>]** key.
- The first Schedule Keeper item that includes the specified time appears on the display. Press **[<sub>SEARCH</sub>]** followed by the **[<sub>▼</sub>]** or **[<sub>▲</sub>]** key to view other data items that match the specification (displayed in chronological order). If the display is not changed by the operation, there are no more entries that match.

**Example:** Find all appointments for 9:30 AM.

Press the **[<sub>SEARCH</sub>]** key to enter the Schedule Keeper and then press the **[<sub>CLEAR</sub>]** key.

- The date at the top of this display is the current date.
- The date at the top of this display is the current date.
- Enter the time, and press the **[<sub>SEARCH</sub>]** key.

The **[<sub>SEARCH</sub>]** indicator appears on the display and the first entry that matches the specified time appears on the display.

- You can press the **[<sub>SEARCH</sub>]** key when you find the entry you want to exit the search function.

## Using Random Search

With random search, you can specify either text or a time to locate the Schedule Keeper information you want. Then the SF-7000/7500 will display all items that include the specified text anywhere in their entries, or whose schedule times include the time you specify.

The following shows how time search is performed by Random Search.

### In memory:

10:00 AM  
10:00 AM ~ 11:00 AM  
10:30 AM  
10:30 AM ~ 12:00 PM  
11:00 AM

Random search specification: 10:30 AM

### Items found:

10:00 AM ~ 11:00 AM  
10:30 AM  
10:30 AM ~ 12:00 PM

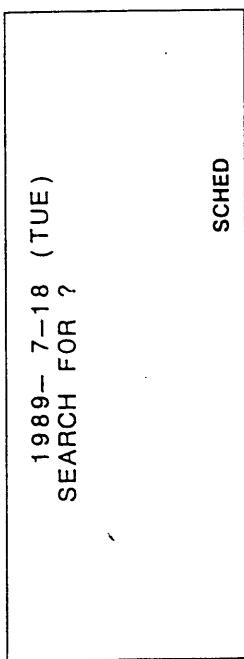

Random search specification: 10:00 AM ~ 11:00 AM

### Items found:

10:00 AM  
10:00 AM ~ 11:00 AM  
10:30 AM  
10:30 AM ~ 12:00 PM

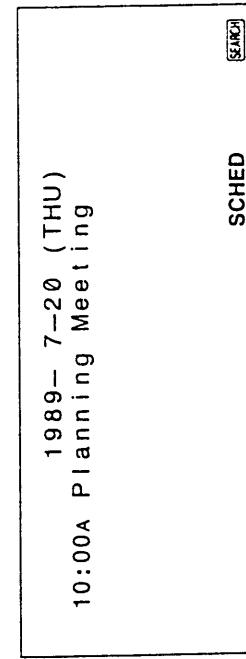

**Example:** Find all of the entries that contain the word "Meeting".

Press the **[SEARCH]** key to enter the Schedule Keeper and then press the **[SEARCH]** key.

- The date at the top of this display is the current date.

Enter the text "Meeting", and press **[SEARCH]** followed by the **[SEARCH]** key.

- You can press the **[SEARCH]** key when you find the entry you want to exit the search function.

## To search for text

1. Press the **[SEARCH]** key to enter the Schedule Keeper.
2. Press the **[SEARCH]** key. The message "SEARCH FOR ?" appears to ask you what text you wish to search for.
3. Enter the text and press **[SEARCH]** followed by the **[SEARCH]** key.
4. The first Schedule Keeper item that includes the specified text at the beginning of an entry appears on the display. Press **[SEARCH]** followed by the **[▼]** or **[▲]** key to view other data items that match the specification (displayed in chronological order). If the display is not changed by the operation, there are no more entries that match.

## 10 search for times

1. Press the **[SEARCH]** key to enter the Schedule Keeper.
2. Press the **[SEARCH]** key. The message "SEARCH FOR ?" appears to ask you what to search for.
3. Enter the time and press the **[SEARCH]** followed by **[SEARCH]** key.
4. The first Schedule Keeper item that includes the specified time appears on the display. Press **[SEARCH]** followed by the **[▼]** or **[▲]** key to view other data items that match the specification (displayed in chronological order). If the display is not changed by the operation, there are no more entries that match.

**Example:** Find all appointments scheduled for 2:00 PM.

Press the **[SEARCH]** key to enter the Schedule Keeper and then press the **[SEARCH]** key.

**[SEARCH] [CLEAR]**

1989—7—18 (TUE)
SEARCH FOR ?

2:00P New Product Campaign
SCHED

The **[SEARCH]** indicator appears on the display and the first entry that is contained in the specified time frame appears on the display.

- You can press the **[SEARCH]** key when you find the entry you want to exit the search function.

**Example:** Find all appointments scheduled between 1:30 PM and 4:00 PM.

While in the Schedule Keeper, press the **[SEARCH]** key and enter the time you wish to find.

<b>SEARCH</b>	<b>1 [TIME]</b>	<b>[P]</b>	<b>30 [TIME]</b>
	<b>4 [TIME]</b>	<b>[P]</b>	
			<b>1:30P</b>
			<b>4:00P</b>
			<b>SCHED</b>

Press **[SEARCH]** followed by the **[SEARCH]** key.

<b>[SEARCH]</b>
<b>1989—7—18 (TUE)</b>
<b>2:00P New Product Campaign</b>
<b>SCHED</b>

## Using the Schedule Alarm Function

If you press the **[SET]** key here, the alarm time will be set at 11:00 AM. Instead, we will change the alarm time to 10:50 AM.

The SF-7000/7500's Schedule Alarm function lets you set alarms to signal scheduled appointment times. The procedure for setting schedule alarms will be explained here using actual examples.

**Example:** Set a schedule alarm for a product meeting scheduled from 11:00 AM to 12:00 PM on July 27, 1989.

**[CLEAR]** **[SWT]** **89** **[DAT]** **7** **[DAT]**  
**27** **[DAT]**

1989— 7-27 (THU)  
12 1 2 3 4 5 6 7 8 9 10 11  
12 1 2 3 4 5 6 7 8 9 10 11  
**SCHED**

Enter the details of the appointment. Be sure to press the **[DAT]** key and make sure that the **[IN]** indicator is shown on the display before entering data.

**[CLEAR]** **[SWT]** **11** **[DAT]** **[DAT]**  
**12** **[DAT]** **P** **[SET]** **PRODUCT** **[P]**  
**[SWT]** **MEETING** **[SWT]**

1989— 7-27 (THU)  
11:00A Product Meeting—  
12:00P  
**SCHED**

To set the schedule alarm, press the **[SCHED]** key. The current alarm time will appear on the display.

**[SCHED]**

1989— 7-27 (THU)  
11:00A Product Meeting—  
12:00P  
**SCHED**

**[SET]** **10** **[DAT]** **50**

1989— 7-27 (THU)  
11:00A Product Meeting—  
12:00P  
**[IN]**  
**SCHED**

Press the **[SET]** key to store the schedule alarm time in memory.

1989— 7-27 (THU)  
11:00A Product Meeting—  
12:00P  
**[IN]**  
**SCHED**

Press the **[IN]** key to exit input and ensure that the **[IN]** indicator disappears from the display.

- The bell “▲” symbol after the schedule time indicates that a schedule alarm is preset for that item.

## When a schedule alarm time is reached

When a time that is preset with a schedule alarm is reached, an audible alarm sounds for 20 seconds and the corresponding schedule data appears.

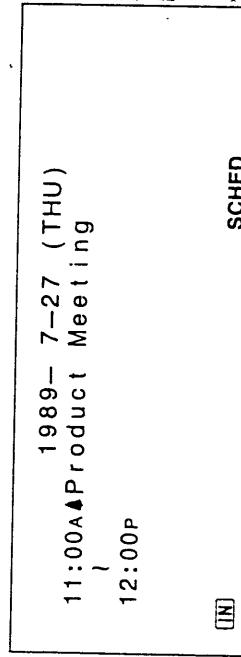

- When a schedule alarm time is reached, the SF-7000/7500 automatically switches ON.

## Checking schedule alarm times

To check the schedule alarm time preset for an entry, display the entry and press the **SCHED** key.

**Example:** View the schedule alarm time preset for the product meeting on July 27, 1989.

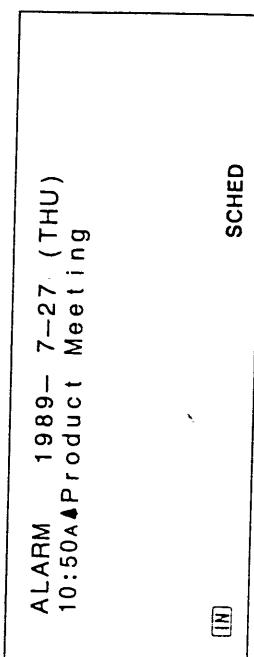

Display the product meeting entry for July 27, 1989.

Press the **SCHED** key.

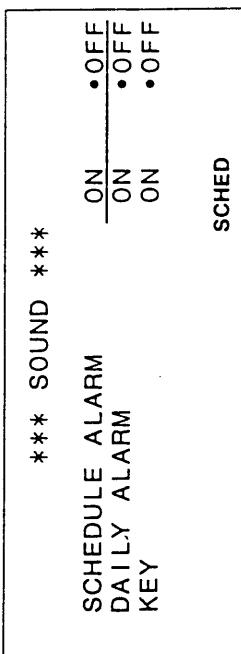

2. Press the **■** key to switch the schedule alarm ON and the **□** key to switch it OFF.
3. After press the **SET** key to register the setting.

## To switch schedule alarm ON and OFF

1. While in the Schedule Keeper, press the **IN** followed by **⑥** key, and the following menu appears on the display.

2. Press the **■** key to switch the schedule alarm ON and the **□** key to switch it OFF.
  3. After press the **SET** key to register the setting.
- Schedule alarms can be preset only for data items that contain a time. If you clear data from a data item that is preset with a schedule alarm, the schedule alarm is automatically cleared, and the schedule alarm indicator disappears from the display.
  - If a schedule alarm time is reached while you are entering or editing the data item for which the schedule alarm is preset, the alarm does not sound until you complete work on the data item.
  - You cannot preset a schedule alarm for a time already preset with another schedule alarm. If you attempt to do so, the message "THAT TIME ALREADY SET FOR SCHEDULE ALARM!" appears on the display when you press the **SET** key.
  - Note that a schedule alarm does not sound if its preset time is reached during data communications (see page 179).
  - The alarm may fail to sound if battery power is too low.

## To cancel a schedule alarm

Cancel the schedule alarm preset for the product meeting from 11:00 AM to 12:00 PM on July 27, 1989.

First, enter the Schedule Keeper and locate the data item.

Press the **[IN]** key and make sure that the **[IN]** indicator is shown on the display. Press the **[ENT]** key followed by **[1]** key to select "DATA ITEM EDIT".

**[ENT]** **[1]**

11:00A	Product Meeting	(THU)
12:00P	ALARM	10:50A
[IN] SCHED		

Press the **[ENT]** key to switch the schedule alarm OFF.

**[ENT]**

11:00A	Product Meeting	(THU)
12:00P		
[IN] SCHED		

Press the **[SET]** key to store the data item in memory.

Press the **[ENT]** key to exit input and ensure that the **[IN]** indicator disappears from the display.

## Using the Timekeeping Function

### About Home Time and World Time

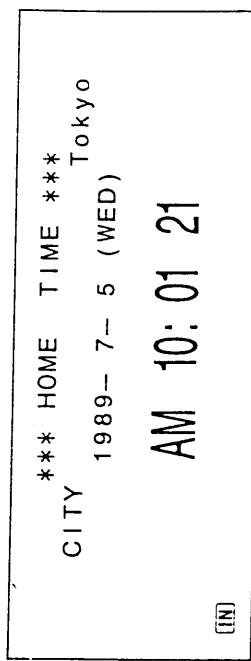

Your SF-7000/7500 comes with its own precision timepiece built in. A World Time function shows you the current time in any one of 127 major cities around the globe. You can specify one of these times as your Home Time, which is used for Schedule Alarms and daily alarm.

### Specifying Home Time

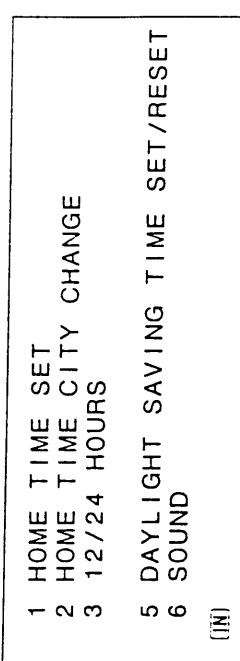

Once you specify one of the time zones as your Home Time, that time is used for Schedule Alarms and daily alarm.

#### To specify your Home Time

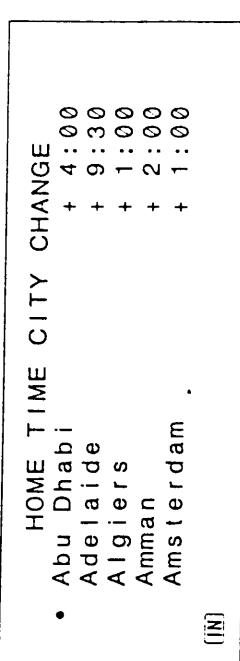

Press the key followed by [DATA/SET]

Press the key, and the following menu appears.

Press **[2]** to select "HOME TIME CITY CHANGE".

City names that can be set as the Home Time appear in alphabetical order on the top of the display. The time on the right shows the difference from Greenwich Mean Time (GMT).

Press the or key to scroll through the city names, or / to scroll a full page at a time.

You can also scroll directly to a specific section of the city list. Simply enter a letter and the block of names that begins with that letter immediately appears on the display. Here, let us enter "N".

N

HOME TIME CITY CHANGE		
• Nairobi	+ 3:00	
New York	- 5:00	
Norfolk Island	+11:30	
Noumea	+11:00	
Oslo	+ 1:00	

[IN]

◀

HOME TIME CITY CHANGE		
• New York	- 5:00	
Norfolk Island	+11:30	
Noumea	+11:00	
Oslo	+ 1:00	
Ottawa	- 5:00	

[IN]

In the above display, "New York" is currently selected, so press the [SET] key to make New York time the Home City time.

[SET]

◀

*** HOME TIME ***		
CITY	1989- 7- 5 (WED)	New York

AM 10: 02 42

[IN]

Press [1] to select "HOME TIME SET".

[1]

◀

*** HOME TIME ***		
CITY	1989- 7- 5 (WED)	New York

AM -10:02

[IN]

Finally, press the [DATA] key to exit data input ([IN] indicator disappears from the display).

## Setting the current time

To set the current time, simply change the time shown in the Home Time display.

To set the current time  
Press [HOME TIME] followed by [IN].

HOME TIME CITY CHANGE	
• Nairobi	+ 3:00
New York	- 5:00
Norfolk Island	+11:30
Noumea	+11:00
Oslo	+ 1:00

[IN]

AM 10: 02 42

[IN]

Press the [IN] key, and the following menu appears.

◀

1 HOME TIME SET	
2 HOME TIME CITY CHANGE	
3 12/24 HOURS	
5 DAYLIGHT SAVING TIME SET/RESET	
6 SOUND	

[IN]

Press [1] to select "HOME TIME SET".

◀

*** HOME TIME ***	
CITY	1989- 7- 5 (WED)

AM -10:02

[IN]

In this example, let us assume that New York time is the Home Time, and that we wish to change it to 11:10 PM, July 6, 1989. Press **PM** followed by **[IN]** to switch from AM to PM. You can switch between AM (**A**) and PM (**P**) while the hours or minutes digits of the time are flashing.

Next, enter 11, followed by **[IN]**.

<b>P</b>	<b>11</b>	<b>[IN]</b>
*** HOME TIME *** CITY 1989-7-5 PM 11: <u>02</u> [IN]		

Now the minutes digits are flashing. Make the following entries.

<b>10</b>	<b>[IN]</b>	<b>89</b>	<b>[IN]</b>
<b>07</b>	<b>[IN]</b>	<b>06</b>	<b>[IN]</b>
*** HOME TIME *** CITY 1989-7-6 PM 11: <u>1</u> <u>0</u> [IN]			

- You can also leave any setting the way it is without making any changes by pressing the **[IN]** key while the digits for the setting are flashing.

If you press the **[IN]** key while the date digit is flashing, the hour digit of the time will start to flash again. After you finish setting the time and date, press **[SET]**.

<b>[SET]</b>
*** HOME TIME *** CITY 1989-7-6 (THU) PM 11:10 00 [IN]

Finally, press the **[IN]** key to exit data input (**[IN]** indicator disappears from the display).

## Setting the daily alarm

Once you set the time for the daily alarm, the alarm will sound every day at that time.

### To set the daily alarm

While the Home Time display is shown (by pressing **[IN]**), press the **[IN]** key. Then press **[IN]** for data input (**[IN]** indicator appears on display).

<b>[IN]</b>
*** ALARM TIME *** PM 10: 00 [IN]

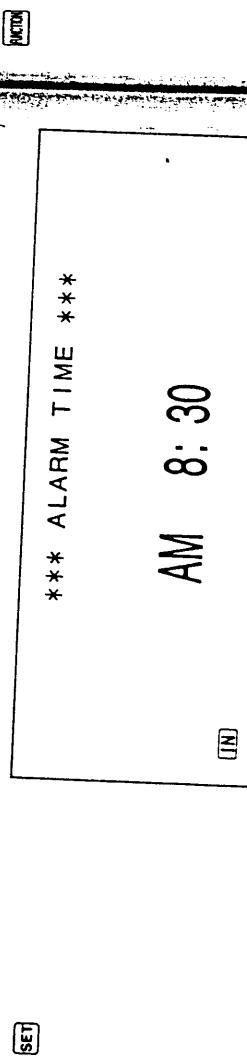

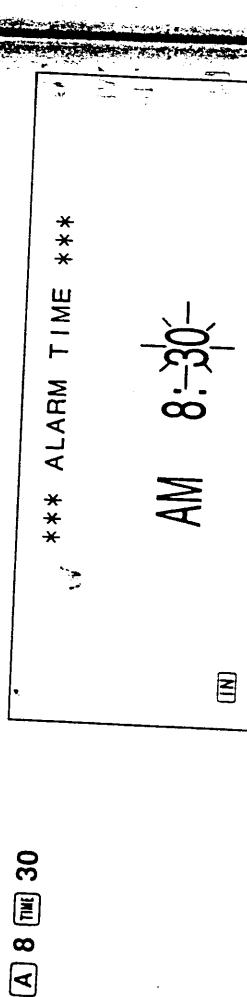

Press the **[IN]** key, and the following menu appears.

<b>[IN]</b>
1 ALARM TIME SET 6 SOUND [IN]

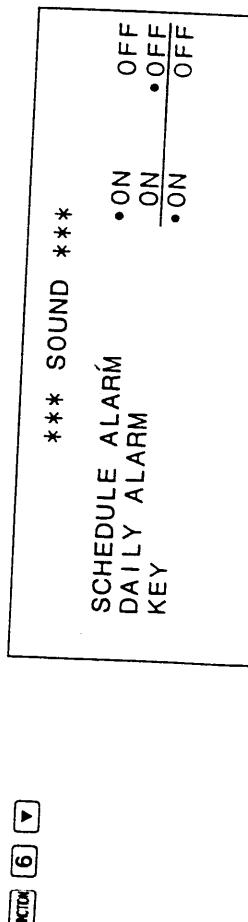

Press **[1]** to select "ALARM TIME SET".

<b>[1]</b>
*** ALARM TIME *** PM -10: 00 [IN]

In this example, let us assume that we wish to set a daily alarm time of 8:30 AM.  
Press [A] to specify AM (press [P] for PM), and then enter the hours followed by [IN], and the minutes.

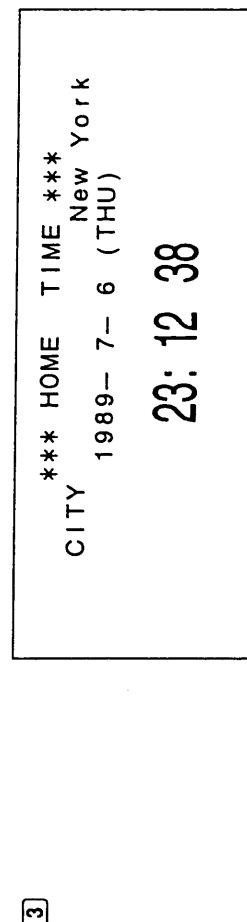

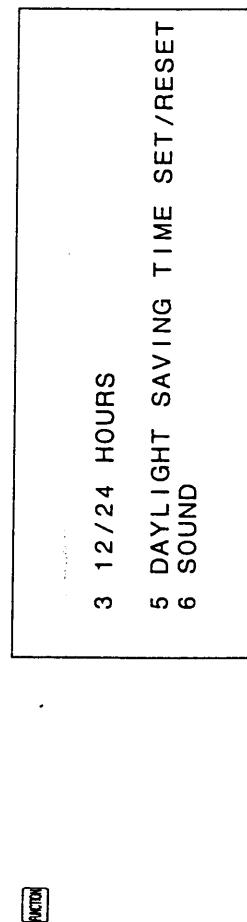

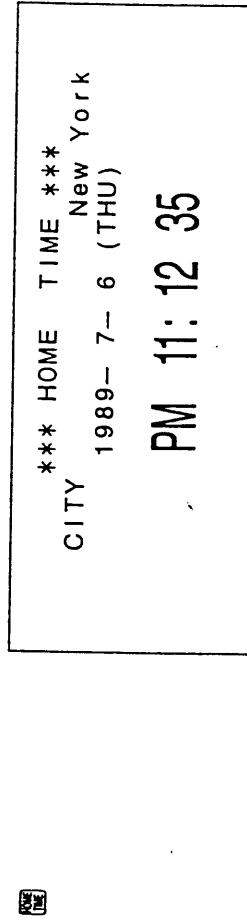

**To switch the daily alarm ON and OFF**  
Press the [SET] key, and then press [6] to select "SOUND".  
Press the [▼] key to select DAILY ALARM, and then press [▼] to switch the alarm ON, or [►] to switch it OFF.

## To switch between 12-hour and 24-hour format

Press the [FNC] key.

## Changing the World Time Display

The procedure to change the city shown in the World Time Display is similar to that used when changing the Home Time Display.  
Press the **WORLD** key.

\*\*\* WORLD TIME \*\*\*  
CITY      1989- 7- 7 (FRI)      London  
                AM 4:43 36

Press the **WORLD** key, and the following menu appears.

## Using the daylight saving time function

This function lets you specify daylight saving time for cities that use such a timekeeping system.

### To switch daylight saving time ON and OFF

Press the **WORLD** key or the **OFF** key.

CITY	*** WORLD TIME ***
	1989- 7- 7 (FRI)
AM	4:43 36

Press the **WORLD** key, and the following menu appears.

2 WORLD TIME CITY CHANGE

5 DAYLIGHT SAVING TIME SET/RESET  
6 SOUND

Press **5** to select "DAYLIGHT SAVING TIME SET/RESET".

**5**

CITY	*** WORLD TIME ***
	1989- 7- 7 (FRI)
AM	5:43 58
DST	

Note that the time has been changed from standard time to daylight saving time, indicated by "DST" on the display. Repeat the above operation to switch from daylight saving time to standard time.

## Using the Mark Function

The Mark function of the SF-7000/7500 lets you mark data item to protect it against being deleted by the delete procedure (see page 154).

### To assign marks to data items

1. Press one of the following keys.

- |                  |                                       |
|------------------|---------------------------------------|
| <b>TEL</b>       | — To mark Telephone Directory data.   |
| <b>DATA CARD</b> | — To mark Business Card Library data. |
| <b>MEMO</b>      | — To mark Memo data.                  |
| <b>SCHEDULE</b>  | — To mark Schedule Keeper data.       |

- 2. Press the **DATA** key ( **IN** indicator appears on the display).
- 3. Press the **CLEAR** key, and enter data.
- 4. Press **SHIFT** followed by **MARK** to mark the data item.
- 5. Press the **SET** key.

- A data item can be marked at any point from when the **IN** key is pressed until the **SET** key is pressed.
- To mark an existing data item, see page 144.

Example: Enter the following data item and mark it.  
Bob Lloyd, 631-343-8221

While in the Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper, press the **DATA** key. At this time the indicator **IN** appears in the lower left of the display to indicate that the SF-7000/7500 is ready for data input. Perform the following sequence to enter the data.

**TEL** **DATA CARD** **CLEAR**  
**CAPS** **LLOYD** **IN**  
**BOB** **IN**  
631-343-8221

**IN** **CAPS** **TEL**

Press **[<sub>SWT</sub>]** followed by **[<sub>MARK</sub>]** to mark the data item. Note the "►" indicator which shows that the data item is marked.

**[<sub>SWT</sub>]**

4. Press **[<sub>END</sub>]** followed by **[<sub>MARK</sub>]** to clear the mark.
  5. Press the **[<sub>SET</sub>]** key.

## Using the Secret Function

The SF-7000/7500's Secret Function lets you store Telephone Directory, Business Card Library, Memo data and Schedule Keeper data in a memory area that is protected by a secret password. Only individuals able to enter the password can view the information stored in the secret memory area.

### To register a password

1. Press one of the following keys.
  - [TEL]** — To protect Telephone Directory data.
  - [<sub>BUS</sub>]** — To protect Business Card Library data.
  - [<sub>MEM</sub>]** — To protect Memo data.
  - [<sub>SKP</sub>]** — To protect Schedule Keeper data.
2. Press the **[<sub>END</sub>]** key (**[IN]** indicator appears on the display).
3. Press the **[<sub>END</sub>]** key, and a message appears prompting you to enter a password to be registered. The password can be up to 160 characters long.
4. Press **[<sub>END</sub>]** again to register the password, and to enter the secret memory area. The indicator "►" is shown on the display while you are in the secret memory area.

- You can register only one password. Be sure not to forget it. If you do, you will have to reset the SF-7000/7500, thus erasing all of the data you have stored in memory.

**Example:** Register "CASIO" as the password.

While in the Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper, press the **[DATA]** key. At this time the indicator **[IN]** appears in the lower left of the display to indicate that the SF-7000/7500 is ready for data input. Then press the **[TEL]** key.

**[TEL] [DATA] [TEL]**

**PASSWORD ?**  
**\*\*\*\*\* SECRET \*\*\***

**[IN] TEL**

Enter "CASIO".

**[CASIO]**

**CASIO\_**

**[IN] [CAS] TEL**

**\*\*\*\*\* SECRET \*\*\***  
**PASSWORD REGISTERED !**

**[IN]**

134

**\*\*\* TELEPHONE DIRECTORY \*\*\***  
**DATA ITEMS MARKED**  
0  
0  
**[IN] [CAS] TEL**

Press **[TEL]** to exit data input (**[IN]** indicator disappears from the display).

- The **[TEL]** key is inoperative when you are entering a password.

Now you can press one of the following keys to store data into the secret memory area. Use the same procedures as those used to store data in the open (non-secret) area.

- [TEL]** — To store Telephone Directory data.
- [ADDRESS CARD]** — To store Business Card Library data.
- [MEMO]** — To store Memo data.
- [SCHEDULE]** — To store Schedule Keeper data.

### To exit the secret area

Simply press the **[TEL]** key to exit the secret area. The data item count that appears on the display does not include items stored in the secret area.

**[TEL]**  
**\*\*\* TELEPHONE DIRECTORY \*\*\***  
**DATA ITEMS MARKED**  
10  
1  
**[IN] [CAS] TEL**

Press **[TEL]** to exit data input (**[IN]** indicator disappears from the display).

135

## Recalling data items stored in the secret area

You must enter the password anytime you wish to access any data items stored in the secret area.

### To enter the secret area

Press the **[]** key, and a message appears to prompt entry of the password.

**CASIO** []

PASSWORD ?	*** SECRET ***
MEMO	

Enter the password, and a message appears to confirm that it is correct.

**CASIO** []

PASSWORD OK !	*** SECRET ***
MEMO	[]

Next, the SF-7000/7500 enters the secret area, indicated by the “**[]**” at the bottom of the display.

DATA ITEMS MARKED	0 0
MEMO	[]

- If you enter a wrong password, the message “PASSWORD MISMATCH !” appears on the display.
- If no password is registered, the message “PASSWORD NOT REGISTERED !”, appears on the display.

Now you can press one of the following keys to recall data into the secret memory area. Use the same procedures as those used to recall data in the open (non-secret) area.

- []** — To recall Telephone Directory data.
- []** — To recall Business Card Library data.
- []** — To recall Memo data.
- []** — To recall Schedule Keeper data.

- If you store data to a Letter Memory that already contains data, the previous data is replaced with the new data.
- To delete data stored in a Letter Memory, simply store a cleared screen (cleared by the **EM** key) to the Letter Memory.

## To recall Letter Memory data

1. Press one of the following keys.
  - TEL** — To enter the Telephone Directory.
  - BUS CARD** — To enter the Business Card Library.
  - MEMO** — To enter the Memo Mode.
  - SCHED** — To enter the Schedule Keeper.
2. Press the **DATA** key ( **[IN]** indicator appears on the display).
3. Move the cursor to the location at which you wish to input the text stored in the Letter Memory.
4. Press the **DATA** key followed by a numeric key from **①** through **⑨**. The key you press indicates the Letter Memory number that the text is assigned to.
5. Press **DATA** to exit data input ( **[IN]** indicator disappears from the display).

Example: Susan's Birthday

While in the Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper, press the **DATA** key. At this time the indicator **[IN]** appears in the lower left of the display to indicate that the SF-7000/7500 is ready for data input. At the point where you wish to enter the text assigned to the Letter Memory, press **DATA** followed by **①**.

<b>DATA</b>	<b>SUSAN'S</b>
<b>DATA</b>	<b>Susan's</b>
<b>[IN]</b>	<b>SCHED</b>

1989- 8- 3 (THU)  
Susan's Birthday  
**[IN]** SCHED

- You can press the **DATA** key to clear the **[IN]** indicator from the display without entering any Letter Memory number.

## Editing Data Items Stored in Memory

After data items are stored in memory, you can edit, delete, and move them as desired. In this section, we will use actual examples to describe the editing procedures.

### To change an existing data item

Change Mary Bush's telephone number from 234-228-9199 to 234-228-8243 (see page 34).

Enter the Telephone Directory and search for the data item under Bush Mary. Be sure to press the **[IN]** key for data input (**[IN]** indicator appears on display).

**TEL** **[IN]** **CAPS** **BUSH**  
**SEARCH**

The SF-7000/7500 enters the open area and the "◀" indicator disappears from the display.

## Duplicating data items

The procedure described in this section comes in handy when you have to enter a data item that is almost identical to another item that is already stored in the Telephone Directory, Business Card Library, Memo, or Schedule Keeper. Simply duplicate the stored item and then make changes as required to create the new item.

Example: Duplicate the data item stored under Lucy Robinson in the Business Card Library and change the new data item to Paul Bean, Art Director.

First, locate the data item stored under Lucy Robinson. Be sure to press the **[DATA]** key for data input (**[IN]** indicator appears on display).

HW ADVERTISING INC.	222-228-1234
ROBINSON LUCY	
Copywriter	
Domestic Advertising Division	
30003	
▼ 89012 A.B. Avenue, New York,

## To reset the SF-7000/7500's memory

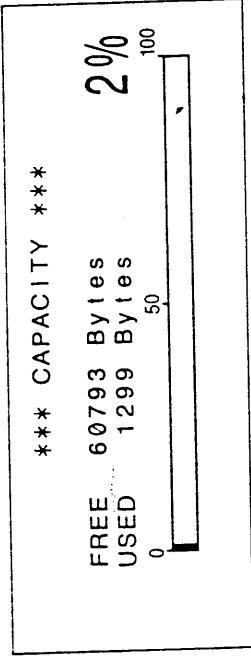

1. Ensuring that the power is switched OFF, remove the back cover of the SF-7000/7500 after removing the three screws that hold it in place.
2. Switch power ON, and press the button marked A in the diagram with thin, pointed object.
3. Replace the back cover and fasten it in place with the three screws.

- When you reset the SF-7000/7500's memory, the Home Time automatically becomes the time for Washington, D.C., the time becomes 12:00 midnight, and the date becomes January 1, 1989.

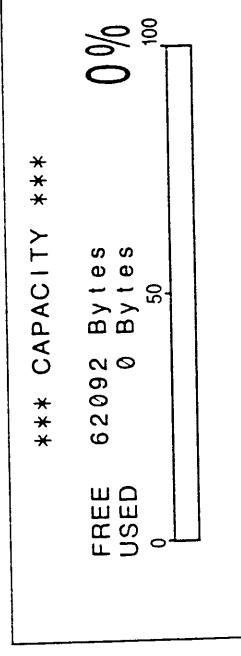

## About the Memory Capacity Display

## Data Input Error Table

The Memory Capacity display tells you how much total memory is used for storage of Telephone Directory, Business Card Library, Memo, Calendar, and Schedule Keeper data. It also shows the percentage of total memory used, and how much total memory area remains. Press the **[<sup>MEM</sup>]** key to check the current memory capacity.

Following the memory reset operation, the display will appear as follows.

(SF-7500)  
With the SF-7000, the value following FREE will be 29,324 bytes. When the percentage of memory used reaches 100%, you will not be able to enter any more data into memory.

Message	Meaning	Action
DATA ITEM NOT FOUND !	Text specified for search does not exist.	Correct or change specified text.
PASSWORD MISMATCH !	Wrong password entered.	Enter correct password.
MEMORY FULL !	No more room in memory for storage of data.	Delete unnecessary data items from memory.
DATA ERROR ! PLEASE RESET !	1. Abnormal data caused by strong impact, static electricity, etc. 2. Hardware problem.	1. Reset memory, erasing all memory contents. 2. Consult with your nearest Casio dealer.

## Using the Calculator Function

Press the **MATRX** key, then the **2nd** function key, then the **4** key, then the **ENTER** key.

By pressing the first value that displays on the screen, the function **Matrices** is selected. The next two values are displayed as **(2, 2)** and **(3, 3)**. This means that the matrix is a  $2 \times 2$  square, consisting of two rows and three columns. The first row consists of the values **(1, 2)** and **(3, 4)**. The second row consists of the values **(5, 6)** and **(7, 8)**. The third row consists of the values **(9, 10)** and **(11, 12)**.

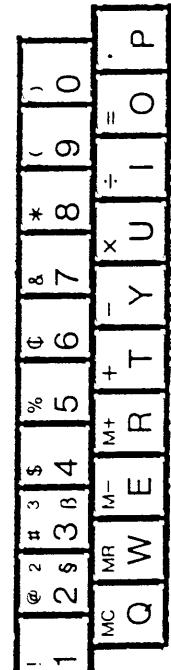

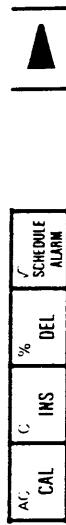

After pressing the **2nd** function key, the function **Matrices** is selected. The next two values are displayed as **(2, 2)** and **(3, 3)**. This means that the matrix is a  $2 \times 2$  square, consisting of two rows and three columns. The first row consists of the values **(1, 2)** and **(3, 4)**. The second row consists of the values **(5, 6)** and **(7, 8)**. The third row consists of the values **(9, 10)** and **(11, 12)**.

After pressing the **2nd** function key, the function **Matrices** is selected. The next two values are displayed as **(2, 2)** and **(3, 3)**. This means that the matrix is a  $2 \times 2$  square, consisting of two rows and three columns. The first row consists of the values **(1, 2)** and **(3, 4)**. The second row consists of the values **(5, 6)** and **(7, 8)**. The third row consists of the values **(9, 10)** and **(11, 12)**.

After pressing the **2nd** function key, the function **Matrices** is selected. The next two values are displayed as **(2, 2)** and **(3, 3)**. This means that the matrix is a  $2 \times 2$  square, consisting of two rows and three columns. The first row consists of the values **(1, 2)** and **(3, 4)**. The second row consists of the values **(5, 6)** and **(7, 8)**. The third row consists of the values **(9, 10)** and **(11, 12)**.

## Performing General Calculations

### Calculation keys

- Numeric keys and decimal key (0 ~ 9, .)

- Arithmetic operator keys (+, -, ×, ÷, =)

Press these keys as they appear in the arithmetic operation, and press the **=** key to obtain the result.

- Root key (□)

Use this key to obtain the square root of a value.

- Independent memory keys (MC, MR, M+, M-)

**MC** — Adds the displayed value to the independent memory.

**MR** — Subtracts the displayed value from the independent memory.

**MR** — Recalls the value stored in the independent memory to the display.

**MC** — Clears the independent memory.

- Cut off key (▶)

Cuts off the least significant (far right) digit of the displayed value.

#### Important

- Before beginning calculations, confirm that '0' is shown on the display, indicating that the SF-7000/7500 is in the CAL mode.
- Be sure to monitor operation on the display as you perform key operations.

## Making corrections in calculations

- If you press the wrong numeric key, press the **c** key and press the correct numeric key.
- If you press the wrong arithmetic operator key, simply press the correct key. This is true for all operator keys except the **=** key.

### About errors

- An error is generated and the indicator "E" appears on the display if a calculation cannot be performed because it is out of range, etc.

### Causes of errors

- The number of digits in the mantissa of an intermediate or a final result exceeds 12 digits.
- When the mantissa of a value in memory exceeds 12 digits.
  - The SF-7000/7500 automatically uses the last value that did not exceed 12 digits.
  - Division by 0.
- To clear an error, press the **c** key and proceed with the calculation, or press the **AC** key and start from the beginning.

## Calculation examples

$53 + 123 - 63 =$	$53 \boxed{+} 123 \boxed{-} 63 \boxed{=}$	0.
$963 \times (23 - 56) =$	$23 \boxed{-} 56 \times 963 \boxed{=}$	113.
$(56 \times 3 - 89) \div 5.2 + 63 =$	$56 \times 3 \boxed{-} 89 \boxed{\div} 5.2 \boxed{+} 63 \boxed{=}$	-31779.
$\sqrt{3} \times 5 =$	$123456 \times 741852 \boxed{=}$	781923076923
$12 + 23 =$	$3 \boxed{\times} 5 \boxed{=}$	9158670807512.
$45 + 23 =$	$23 \boxed{+} 12 \boxed{=}$	8.6602540378
$78 + 23 =$	$45 \boxed{=}$	35.
$7 - 5.6 =$	$78 \boxed{=}$	K+
$2 - 5.6 =$	$5.6 \boxed{-} 7 \boxed{=}$	K+
$2.3 \times 12 =$	$2 \boxed{\times} 3 \boxed{=}$	K-
$4.5 \times 12 =$	$12 \boxed{\times} 2.3 \boxed{=}$	K-
$45 \div 9.6 =$	$4.5 \boxed{\div} 9.6 \boxed{=}$	-3.6
$78 \div 9.6 =$	$9.6 \boxed{\div} 45 \boxed{=}$	27.6
12% of 1500	$78 \boxed{=}$	54.
Percentage of 660 against 880	$1500 \times 12 \boxed{=}$	4.6875
15% add-on of 2500	$660 \div 880 \boxed{=}$	K+
25% discount of 3500	$2500 \times 15 \boxed{-} \boxed{=}$	8.125
What will the selling price and profit be when the purchasing price of an item is \$480 and the profit rate to the selling price is 25%?	$3500 \times 25 \boxed{-} \boxed{=}$	180.
If you made \$80 last week and \$100 this week, what is the percent increase?	$480 + 25 \boxed{-} \boxed{=}$	75.
$80 \times 9 = 720$	$100 - 80 \boxed{=}$	2875.
$-) 50 \times 6 = 300$	$\boxed{MC} 80 \times 9 \boxed{MC} \boxed{=}$	2'625.
$20 \times 3 = \frac{60}{480}$	$50 \times 6 \boxed{MC} \boxed{=}$	640.
	$20 \times 3 \boxed{MC} \boxed{=}$	160.

## Performing Date Calculations

- Date calculations can be performed in the range of January 1, 1901, through December 31, 2099.
- Calculations that exceed this range result in an error ("E" displayed).
- Example:** Determine how many days there are from December 5, 1989 to July 3, 1990.

**CAL** **1990** **DATE** **7** **DATE** **3** **—**

**1990 - 7 - 3**

- For 20th century years, you only need to enter the final two digits.

**CAL** **89** **DATE** **12** **DATE** **5** **—**

**1989 - 12 - 5**

**210.**

The result is 210 days.

**Example:** Determine the date that is 300 days from December 20, 2010.

AC 2010 DATE  
12 DATE 20 +

2010 - 12 - 20

+ (MON)

100 =

- For 21st century years, you must enter all four digits.

300 =

2011 - 10 - 16

(SUN)

The result is October 16, 2011.

**Example:** Determine the dates 50, 100, and 150 days from October 11, 1989 (using a constant).

89 DATE 10 DATE  
11 + +

1989 - 10 - 11

K+ (WED)

- 15 =

50 =

K+ (THU)

1989 - 11 - 30

100 =

150 =

**Example:**

Determine the dates 15, 30, and 45 days before February 5, 1990 (using the memory).

AC MC 90  
DATE 2 DATE 5 M+

1990 - 2 - 5

M (MON)

M (SUN)

1990 - 1 - 21

K+ (FRI)

1990 - 1 - 19

K+ (SAT)

1990 - 3 - 10

(SUN)

30 =

( SAT )

**1990 - 1 - 6**

45 =

( FRI )

**1989 - 12 - 22**

## Using the Data Communication Function

After you have connected your two computers, you can use the data communication function to exchange files between them. This function is available in the COMM icon.

The COMM icon has three subicons:

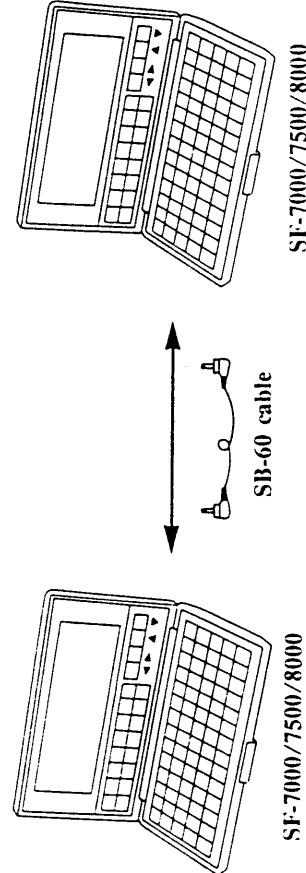

- File Transfer
- File Exchange
- File Comparison

File Transfer is used to transfer files from one computer to another. File Exchange is used to exchange files between two computers. File Comparison is used to compare files between two computers.

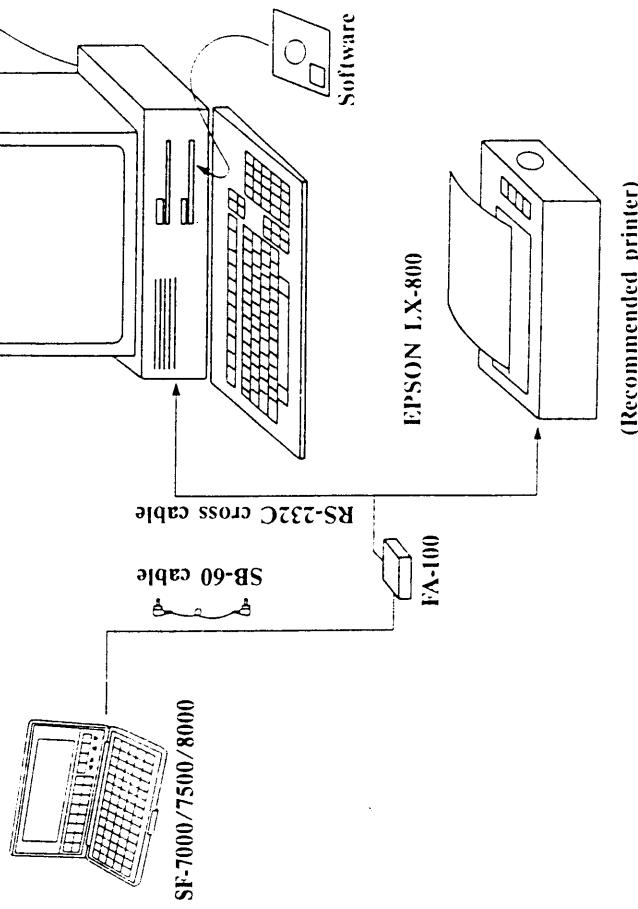

RA

## About the Data Communication Function

Using the accessory SB-60 cable that comes with your SF-7000/7500/8000, you can connect two SF-7000/7500/8000 units together and transfer data between them. You can connect two SF-7500 units, two SF-7000 units, an SF-7500 unit with an SF-7000 unit or an SF-8000 unit with an SF-7000/7500 unit.

Also available from your Casio dealer is the optional FA-100 Interface Unit which makes it possible to connect your SF-7000/7500 to a personal computer (IBM PC/AT, PS/2) or a printer (EPSON LX-800, using #8143 serial interface). The FA-100 Interface Unit also comes complete with a floppy disk that contains software utilities that gives your personal computer the ability to handle SF-7000/7500 data. This software also makes it possible to transfer Lotus 1-2-3 data from your personal computer to the SF-7000/7500.

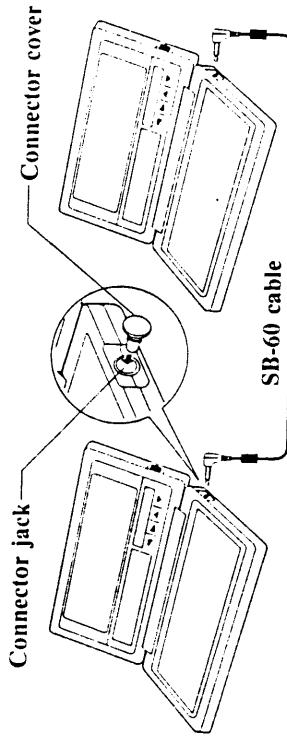

For full details on transferring data via the FA-100 Interface Unit, see the Owner's Manual that comes with the FA-100.

## Connecting Two SF-7000/7500 Units

You can connect two SF-7500 units, two SF-7000 units, an SF-7500 unit with an SF-7000 unit or an SF-8000 unit with an SF-7000/7500 unit using the accessory SB-60 cable.

### To connect two SF-7000/7500 units

1. First, ensure that the power of the two SF-7000/7500 units being connected is switched OFF.
2. Remove the connector covers from the connector jacks of the two SF-7000/7500 units.
  - Be careful not to lose the connector covers. They should be replaced in the connector jacks whenever the SB-60 cable is disconnected.
3. Connect the two units using the SB-60 cable.

4. Connect the SF-7000/7500 to the FA-100 Interface Unit using the accessory SB-60 cable.
5. Switch the power of the personal computer ON, followed by the FA-100 Interface Unit, and then the SF-7000/7500.
  - When data transfer operations are complete, switch power off in the sequence: SF-7000/7500, FA-100 Interface Unit, and then personal computer. Next, disconnect the units.

The following are the hardware requirements when transferring data from the SF-7000/7500 to an IBM computer via the FA-100 interface unit.

#### 1. Personal Computer

Model: IBM PC/AT or Personal System 2 (PS/2)

RAM: At least 512KB

Display type:

- PC/AT — EGA monitor + CGA board (CGA cannot be used)
- PS/2 — VGA monitor + VGA board (MGGGA cannot be used)

Graphic memory capacity: At least 256KB

Data communication: RS-232C interface

#### 2. RS-232C Cable

Number of pins:

- PC/AT — 25 pins ↔ 9 pins
- PS/2 — 25 pins ↔ 25 pins

To use a 25-pin ↔ 25-pin with the PC/AT, a 9-pin female ↔ 25-pin male conversion cable is required.

#### Wiring Diagram:

- 1) PS/2 (with 25-pin↔25-pin RS-232C cable)

Pin #

### To connect an SF-7000/7500 with a personal computer

1. First, ensure that the power of the SF-7000/7500 unit and the personal computer is switched OFF.
2. Connect the personal computer to the FA-100 Interface Unit, using an RS-232C cross cable.
  - If you are connecting to an IBM PC/AT, use a 9-pin cable. For an IBM PS/2, use a 25-pin cable.
3. Remove the connector cover from the connector jack of the SF-7000/7500.
  - Be careful not to lose the connector cover. It should be replaced in the connector jack whenever the SB-60 cable is disconnected.

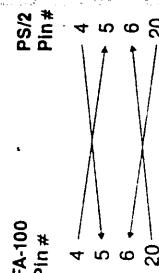

- 3) PC/AT (with 25-pin ↔ 25-pin RS-232C cable and 25-pin ↔ 9-pin conversion cable)

The above illustration shows the logical wiring arrangement. Other wiring can be used as long as it meets the following conditions:

#### PS/2

- #2 of FA-100 is connected to #3 of PS/2.
- #3 of FA-100 is connected to #2 of PS/2.
- #7 of FA-100 is connected to #7 of PS/2.
- #4 and #20 are data send pins, while #5 and #6 are data receive pins. Send pins must be connected to receive pins.

#### To connect an SF-7000/7500 with a printer

- First, ensure that the power of the SF-7000/7500 unit and the printer is switched OFF.
- Printer — EPSON LX-800, using #8143 serial interface.
- Connect the printer to the FA-100 Interface Unit using an RS-232C cross cable.
- Remove the connector cover from the connector jack of the SF-7000/7500.
- Be careful not to lose the connector cover. It should be replaced in the connector jack whenever the SB-60 cable is disconnected.
- Connect the SF-7000/7500 to the FA-100 Interface Unit.
- Switch the power of the FA-100 Interface Unit ON, followed by the printer, and then the SF-7000/7500.
  - When data transfer operations are complete, switch power off in the sequence: SF-7000/7500, FA-100 Interface Unit, and then printer. Next, disconnect the units.

## Setting the Hardware Parameters

Before you can perform data communications, you must first set up certain hardware parameters to make sure that the two units are able to understand each other. The parameters of the send unit and the receive unit must be the same for them to be able to communicate with each other. There are three hardware parameters that must be set:

Parameter	Settings
PARITY	EVEN / ODD / NONE
BIT LENGTH	7 bits / 8 bits
BPS	1200 / 2400 / 4800 / 9600

#### To set the hardware parameters

Let us say that we wish to set the hardware parameters for EVEN parity, a data bit length of 8 bits, and a baud rate of 4800. While in the Calendar Display, Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper, press the **[FNC]** key followed by **[4]** to select “DATA COMMUNICATION”. Press **[4]** to select “SET HARDWARE PARAMETERS”.

SET HARDWARE PARAMETERS
PARITY
BIT LENGTH
BPS

EVEN ODD **NONE**  
**7 bits** 8 bits  
1200 2400 4800 **9600**  
TEL

(The display above is the default specifications following the RESET operation.)

The hardware parameters highlighted on the display are those that are currently selected. Note that the PARITY selection is flashing. Press the **◀** and **▶** cursor keys to change the current PARITY selection until EVEN is selected.

SET HARDWARE PARAMETERS			
PARITY	<b>EVEN</b>	ODD	NONE
BIT LENGTH	7 bits	8 bits	9 bits
BPS	1200	2400	4800
<b>TEL</b>			

SET HARDWARE PARAMETERS			
PARITY	<b>EVEN</b>	ODD	NONE
BIT LENGTH	7 bits	8 bits	9 bits
BPS	1200	2400	4800
<b>TEL</b>			

SET HARDWARE PARAMETERS			
PARITY	<b>EVEN</b>	ODD	NONE
BIT LENGTH	7 bits	8 bits	9 bits
BPS	1200	2400	4800
<b>TEL</b>			

Next, press the **▼** cursor key to move to the BIT LENGTH selection. Use **◀** and **▶** to select 8 bits.

**▼ ▶**

- Before actually getting into actual data communications, we should first define a few rules about how the SF-7000/7500 conducts data communications. Generally, you will have a number of options when transferring data:
- ONE DATA ITEM**
- This option sends a single selected Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper data item from one unit to the other.
- MONTH**
- This option sends highlighted date data for a single selected month's Calendar Display.
- MODE DATA ITEMS**
- This option sends all of the data items contained in the Telephone Directory, Business Card Library, or Memo Mode from one unit to the other. In the Schedule Keeper, this option sends all of the schedule data stored for a specific period. In the Calendar Display, this option sends highlighted date data for a specific period.
- ALL DATA ITEMS**
- This option sends all Telephone Directory, Business Card Library, Memo Mode, Schedule Keeper and Calendar Display data stored in one unit to the other. Note that if the secret memory area of the SF-7000/7500 is accessed during this operation, secret area data only are sent. Otherwise, open (non-secret) area data only are sent.

**Note**

You can exit from data communication menus by pressing the **[SET]**, **[SEND]**, **[RECV]** or **[TEL]** key.

## About Data Communications

## Setting up the Receive SF-7000/7500 Unit

The following procedures describe how to set up an SF-7000/7500 unit to receive data from another SF-7000/7500 or from a personal computer.

### To set up the receive SF-7000/7500 unit

1. While in the Calendar Display, Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper, press the **[DATA IN/OUT]** key. At this time the indicator **[IN]** appears in the lower left of the display to indicate that the SF-7000/7500 is ready for data input.
2. Press the **[FACT]** key followed by **[4]** to select "DATA COMMUNICATION", and the following menu appears.

**[TEL] [DATA IN/OUT] [FACT] [4]**

1	TRANSMIT
2	RECEIVE
3	PRINT
4	SET HARDWARE PARAMETERS
	—DATA COMMUNICATION—
[IN]	TEL

3. Press **[2]** to select "RECEIVE" and the following display appears to indicate that the SF-7000/7500 is ready to receive data.

**[2]**

RECEIVE OK !  
TO, STOP PRESS **[NEXT]** KEY

- If the secret memory area (see page 133) is accessed, the data received is stored in the secret memory area.
- When transferring MODE DATA ITEMS or ALL DATA ITEMS, each data item is displayed on the receiving unit as it is received.
- When receipt of ONE DATA ITEM is complete, the received data item is shown on the display.
- When receipt of MODE DATA ITEMS is complete, the receiving unit enters the mode (Telephone Directory, Business Card Library, etc.) for the data items received.
- When receipt of ALL DATA ITEMS is complete, the receiving unit enters the mode which was last transferred.
- The following messages appear on the display of the receiving unit when a problem occurs during data communications. All data transferred up to display of the message is retained in memory, but data communication is terminated. If one of the following error messages appears, press the **[TEL]**, **[DATA IN/OUT]**, **[MEMO]**, **[SCHEDULE]** or **[ALARM]** key to clear the error message. Then, take corrective action and try data communication again.

Message	Cause
STOPPED !	<ul style="list-style-type: none"><li>• <b>[NEXT]</b> key pressed on transmitting or receiving unit.</li><li>• Memory area of receiving unit full.</li></ul>
TRANSMIT ERROR !	Cable connection broken or abnormal noise in cable.
MEMORY FULL !	Memory area of receiving unit full.

- When ONE DATA ITEM is sent from a computer to an SF-7000/7500 unit, the computer returns to its initial display.
- After preparing the SF-7000/7500 to receive data, it can receive data regardless of the mode of the transmitting unit.
- If a schedule alarm data received via data communication has identical time to one that is already stored in memory, the message "THAT TIME ALREADY SET FOR SCHEDULE ALARM !" appears on the display and the schedule alarm data being received is not stored in memory.

## Transmitting Data

4. Press **[3]** to select 'ALL DATA ITEMS', and the following display appears to confirm whether you wish to proceed.

3

TRANSMIT ALL DATA ITEMS ?

YES **SET** /NO **NEXT**

TEL

5. Press the **SET** key to proceed with the data transmission, or press **[SET]** if you wish to cancel.

SET

NOW TRANSMITTING !

TO STOP PRESS **NEXT** KEY

- Data are transmitted in the sequence of Telephone Directory data, Business Card Library data, Memo data, Schedule Keeper data and Calendar data.

TEL **FACTORY** **4**

1 TRANSMIT

3 PRINT

4 SET HARDWARE PARAMETERS

-DATA COMMUNICATION-

TEL

3. Press **[1]** to select "TRANSMIT" and the following menu appears.

1

1 ONE DATA ITEM

2 MODE DATA ITEMS

3 ALL DATA ITEMS

-TRANSMIT-

TEL

The procedures described in this section make it possible to send data from one SF-7000/7500 to another. Some procedures differ slightly depending upon the type of data being sent.

### To send all data items

1. First, confirm that the message "RECEIVE OK !" is shown on the display of the receiving unit.
2. While the transmitting unit is in the Calendar Display, Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper, press the **FACTORY** key followed by **[4]** to select "DATA COMMUNICATION", and the following menu appears.

TEL **FACTORY** **4**

## To send ONE DATA ITEM in the Telephone Directory, Business Card Library, or Memo Mode

Note that the procedures described below are performed while the initial display of the Telephone Directory, Business Card Library, or Memo Mode is shown, immediately after pressing the corresponding key to enter any of these modes.

Send the Memo data under the name "PRICE LIST (TAX FREE)".

1. First, confirm that the message "RECEIVE OK!" is shown on the display of the receiving unit.
2. Press the **DATA** key of the transmitting unit to enter the Memo Mode.
3. Press the **DATA** key followed by **4** to select "DATA COMMUNICATION", and the following menu appears on the display.

**[DATA]** **[4]**

1 TRANSMIT	
3 PRINT	
4 SET HARDWARE PARAMETERS	
-DATA COMMUNICATION-

7. Press the **SET** key to begin transmission of the displayed calendar, or the **SET** key to return to the Calendar display for the month selected in Step 6.
  - You can interrupt data transmission by pressing the **SET** key.
  - After data item transmission is complete, the display in Step 7 will reappear.
  - At this time you can select another calendar for and press **SET** to transmit it, or you can exit the transmit function by pressing **SET**.

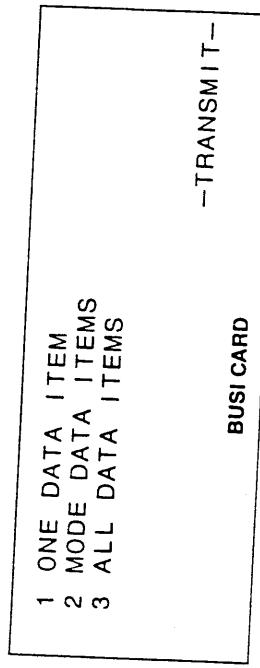

## To send MODE DATA ITEMS in the Telephone Directory, Business Card Library, or Memo Mode

Send all data items stored in the Business Card Library.

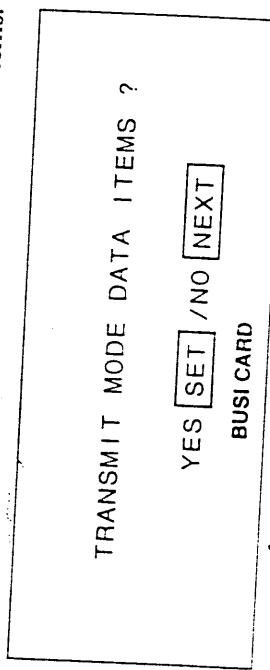

1. First, confirm that the message "RECEIVE OK!" is shown on the display of the receiving unit.
2. Press the **DATA COMMUNICATION** key of the transmitting unit to enter the Business Card Library.
3. Press the **DATA COMMUNICATION** key followed by **[4]** to select "DATA COMMUNICATION", and the following menu appears on the display.

4. Press **[1]** to select "TRANSMIT" and the following menu appears on the display.

5. Press **[2]** to select "MODE DATA ITEMS" and a message appears on the display to confirm whether or not you wish to transmit the data items.

6. Press the **SET** key to begin transmission of the displayed data item, or the **END** key to return to the "DATA COMMUNICATION" menu.

- You can interrupt data transmission by pressing the **END** key.
- After data item transmission is complete, the transmitting and receiving unit will be in the Business Card Library.

## To send MODE DATA ITEMS for a specific period in the Schedule Keeper

Send all data items stored in the Schedule Keeper from July 1, 1989 through July 31.

1. First, confirm that the message "RECEIVE OK!" is shown on the display of the receiving unit.
2. Press the **[FNC]** key of the transmitting unit to enter the Schedule Keeper, and enter the starting date (July 1, 1989) to recall its Timetable Display.
3. Press the **[FNC]** followed by **[4]** to select "DATA COMMUNICATION", and the following menu appears on the display.

6. Specify the ending month (December 1989), and press the **[SET]** key to begin transmission, or the **[KEY]** key to return to the "DATA COMMUNICATION" menu.

**89 [DATE] 12 [DATE]**

*** MODE DATA TRANSMIT ***
FROM: 1989-1
TO: 1989-12
TRANSMIT ? YES [SET] /NO [NEXT]

- You can interrupt data transmission by pressing the **[KEY]** key.
- After data item transmission is complete, the display returns to the display of the transmitting and receiving units show the last calendar transmitted on the left side.
- Even if the starting month you specify is chronologically after the ending month (from December 1989 through January 1989, for example), the SF-7000/7500 still transmits the data starting from January and ending with December.

## Printing Data

### Printing Error Messages

If one of the following error messages appears during printing, press the **TEL**, **ITEM**, **ITEM**, **ITEM**, or **ITEM** key to clear the error message. Then, take corrective action and try printing again.

Message	Meaning	Action
STOPPED !	Printing stopped manually.	Print again.
PRINT ERROR !	Connection between SF-7000/7500 and unit broken, or noise in the line.	Check that connections are secure and print again.

This option lets you print a single selected Telephone Directory, Business Card Library, Memo Mode, or Schedule Keeper data item.

#### ONE DATA ITEM

You have a number of options when printing data:

#### About printing

You can connect the SF-7000/7500 to a printer using the optional FA-100 interface unit and an RS-232C cross cable. As with data communications, you can select a variety of formats for printing data.

#### MODE DATA ITEMS

This option lets you print all of the data items contained in the Telephone Directory, Business Card Library, or Memo Mode. In the Schedule Keeper, this option prints all of the schedule data stored for a specific period. In the Calendar Display, this option prints the calendars for a specific period.

This option lets you print a calendar for a single selected month.

#### MONTH

1. Press the **TEL** key to enter the Telephone Directory.
2. Press the **ITEM** key followed by **4** to select "DATA COMMUNICATION", and the following menu appears on the display.

**TEL** **ITEM** **4**

- Even if the starting month you specify is chronologically after the ending month (from December 1989 through January 1989, for example), the SF-7000/7500 still prints the data starting from January and ending with December.

## Specifications

**Model:** SF-7000/SF-7500

### Data storage:

Telephone/business card/memo/schedule data storage/recall, calendar display, marker, letter memory, secret area, editing, capacity display, auto display

5. Average of accuracy  $\pm 3$  seconds per day under normal temperatures; world-time, schedule alarm, daily alarm

### Calculation:

12-digit arithmetic calculations, constants for  $+/- \times/\div$ , independent memory, percentages, square roots, 24-digit approximations, date calculations, other mixed calculations

### General:

Display element: 32-column x 6-line LCD  
Memory capacity: SF-7000: 32KB (29,324 bytes)  
SF-7500: 64KB (62,092 bytes)

Main component: LSI  
Power supply: 3 lithium batteries (CR2025)  
Power consumption: 0.1W

Battery life: Approximately 85 hours

Auto power off: Approximately 6 minutes after last key operation  
Operating temperature:  $0^{\circ}\text{C} \sim 40^{\circ}\text{C}$  ( $32^{\circ}\text{F} \sim 104^{\circ}\text{F}$ )

Dimensions:  
Unfolded:  $7.5\text{H} \times 13.3\text{W} \times 1.48\text{mmD}$  ( $1\frac{1}{4}^{\prime\prime}\text{H} \times 5\frac{1}{4}^{\prime\prime}\text{W} \times 5\frac{7}{8}^{\prime\prime}\text{D}$ )  
Folded:  $15\text{H} \times 13.3\text{W} \times 7.4\text{mmD}$  ( $5\frac{1}{8}^{\prime\prime}\text{H} \times 5\frac{1}{4}^{\prime\prime}\text{W} \times 2\frac{7}{8}^{\prime\prime}\text{D}$ )  
Weight: 148g (5.2 oz)

## Menu Table

A menu appears each time you press the **MOU** key. The options contained in each menu depends on whether you are inputting or outputting data, as well as the mode that the unit is in.
